Introduction

Finance is an essential and integral part of our business school curriculum. Drawing inputs from several, but inter-related disciplines including management, commerce and economics, finance is a basket full of jargon. Teaching finance involves simplifying concepts without letting the terms lose their gravity. This paper explores some key personal finance and investing topics that can be used in both professional and personal financial life.

Methods

While a classroom setup is necessity to introduce financial jargon and make students comfortable with, a handpicked mix of modern tools such as internet websites and smartphone apps increase the student interest, involvement and engagement. Colourful presentation slides add excitement to theoretical concepts. They can be supplemented with pre-computed tables (to explain what-if scenarios) and with graphs (to explain impact of late / incorrect decision making). Since investing decision making is not simple and straight forward, and often uses consensus from various data points, it is important to bring all details into a single page – both in terms of fundamental and technical analysis. A template / worksheet-based scoring system can help in this regard. Needless to say, spreadsheet skills are mandatory to do decent financial analysis, at least at basic level (Zhang, 2014). Even for mutual funds, a check-list driven evaluation system and a point-scoring system can help. However, industry-grade stock market data feeds are to be purchased and are often out of reach for smaller educational institutions or in ad hoc setups such as in a workshop. An

The Future of High-Cost Credit Jodi Gardner,2022-07-14 This book proposes a new way of thinking about the controversial and complex challenges associated with the regulation of high cost credit specifically payday lending These products have received significant attention in both the media and political arena The inadequacy of regulatory interventions has created ongoing problems with the provision of high cost credit particularly for consumers with lesser bargaining power and who are already financially vulnerable The book tackles two specific gaps in the existing literature The first involves inadequate analysis of the relevant philosophical concepts around high cost credit which can result in an over simplification of what are particularly complex issues The second is a lack of engagement in both the market

and lived experience of borrowers resulting in limited understanding of those who use these financial products The Future of High Cost Credit explores the theoretical grounding policy initiatives and interdisciplinary perspectives associated with high cost credit making a novel and insightful contribution to the existing literature The problems with debt extend far beyond the legal sphere and the book will therefore be of interest to many other academic disciplines as well as for those working in public policy and the third sector
