ROUGH TERRAIN MOBILITY ... An exclusive hydraulic suspension system with four wheels allows the crane to travel over the roughest terrain. An optional hydraulic differential for the rear axle is also available. New gear and hydraulic pump design have provided more efficiency when traveling.

TERRAIN-ADJUSTED CAB DESIGNED FOR OPERATOR COMFORT ... There is never a hard spot for the operator as the cab swings with the boom, keeping the operator facing the load at all times. The cab features a large forged, steel trough, a 360-degree front windshield and sliding side and rear windows for ventilation. Radiating and power controls for lights, horn and air are changed in a convenient floor pattern for operator convenience.

SMOOTH POWER UPFS ... Grove's planetary gear drive hoist, power up and down, is standard. Hoist and lowering speeds can be controlled from both the floor and also at load condition.

TOOL STORAGE is provided in a large cabinet for up to 100 tools located forward in the chassis deck.

THE HIGHER LOAD MOMENT INDICATOR AND AUTO-TWO-BLINDER SYSTEM improves operator control of the crane and increases their work output by keeping them from overloading the crane with a continuous visual display of crane load. Fully responsive, high speed, mechanical movement with color-coded scales, an integral hoist and moment warning system alerts the operator if an overload or two-blinder condition exists. After the Grove automatic hoist, usually during the lift, flow from these functions often contribute to an overload in two-blinder operation, preventing operation of only those crane functions that will improve the situation.
