

FIREARMS SAFETY — YOUR RESPONSIBILITY

SAFETY MUST BE THE FIRST AND CONSTANT CONSIDERATION OF EVERY PERSON WHO HANDLES FIREARMS AND AMMUNITION.

This Instruction Manual is designed to assist you in learning how to use and care for your RUGER® MARK II Pistol properly.

Only when you are certain you fully understand the Manual and can properly carry out its instructions should you practice loading, unloading, etc. with live ammunition.

If you have any doubts about your ability to handle or use a particular type of gun safely, then you should seek supervised instruction.

Such personalized instruction is often available from gun dealers, gun clubs or police departments. If none of these sources can help you, write to the National Rifle Association, Washington D.C. 20038. They will assist you.

The person with a gun in his possession has a full-time job. He cannot guess; he cannot forget. He must know how to use his firearm safely. *Do not use any firearm without having a complete understanding of its particular characteristics and safe use.* Remember: There is no such thing as a foolproof gun.

GENERAL INFORMATION AND MECHANICAL CHARACTERISTICS

The Ruger Mark II Standard and Mark II Target Models are .22 caliber rimfire, 10-shot, magazine-fed, semi-automatic recoil ("blowback") operated pistols. Both models have the same basic operating mechanism and include the following features with which the gun user should be thoroughly familiar.

Bolt Stop: The bolt hold-open mechanism is actuated by the follower button (left side of magazine) when the button is in its topmost position. Thus, when the last shot has been fired and the magazine is empty, the button moves the bolt stop to hold the bolt open. When there is an empty magazine in the pistol and the bolt is retracted manually, the bolt stop will automatically hold the bolt open. If there is a loaded magazine in the pistol or if there is no magazine in the pistol, the user can actuate the bolt stop mechanism to hold the bolt open by retracting the bolt and pushing up the bolt stop.

If there is an empty magazine in place, the bolt stop can be released by drawing back slightly on the bolt and depressing the bolt stop thumbpiece. When the bolt is released, it will move forward under pressure from the recoil spring.

NOTE: If a loaded magazine is inserted in the pistol when the bolt is closed and the bolt is then retracted fully, the bolt stop will not automatically hold open the bolt. However, in such a situation the bolt stop can be manually actuated, by pushing the thumbpiece upwards, to hold the bolt open.

WARNING: The bolt stop is spring-loaded to move downward. Therefore, when there is a loaded magazine in place and the pistol is jarred to the extent that the bolt moves rearward, releasing tension on the bolt stop, the bolt will fly forward and chamber a cartridge. For this reason and as an essential safety practice, the safety of the pistol should always be in the on ("S") position except when the user is positioned to fire the gun at a selected target.
