Fashion Recommender Systems Nima Dokoohaki,2020-11-04 This book includes the proceedings of the first workshop on Recommender Systems in Fashion 2019 It presents a state of the art view of the advancements within the field of recommendation systems with focused application to e commerce retail and fashion The volume covers contributions from academic as well as industrial researchers active within this emerging new field Recommender Systems are often used to solve different complex problems in this scenario such as social fashion based recommendations outfits inspired by influencers product recommendations or size and fit recommendations The impact of social networks and the influence that fashion influencers have on the choices people make for shopping is undeniable For instance many people use Instagram to learn about fashion trends from top influencers which helps them to buy similar or even exact outfits from the tagged brands in the post When traced customers social behavior can be a very useful guide for online shopping websites providing insights on the styles the customers are really interested in and hence aiding the online shops in offering better recommendations and facilitating customers quest for outfits Another well known difficulty with recommendation of similar items is the large quantities of clothing items which can be considered similar but belong to different brands Relying only on implicit customer behavioral data will not be sufficient in the coming future to distinguish between for recommendation that will lead to an item being purchased and kept vs a recommendation that might result in either the customer not following it or eventually return the item Finding the right size and fit for clothes is one of the major factors not only impacting customers purchase decision but also their satisfaction from e commerce fashion platforms Moreover fashion articles have important sizing variations Finally customer preferences towards perceived article size and fit for their body remain highly personal and subjective which influences the definition of the right size for each customer The combination of the above factors leaves the customers alone to face a highly challenging problem of determining the right size and fit during their purchase journey which in turn has resulted in having more than one third of apparel returns to be caused by not ordering the right article size This challenge presents a huge opportunity for research in intelligent size and fit recommendation systems and machine learning solutions with direct impact on both customer satisfaction and business profitability **Mekeel's Weekly Stamp News** I. widely debated But often lost in the heat of debate is the fact that vouchers are just another tool in the government's tool chest a restricted subsidy that falls somewhere between the extremes of cash and direct government provision of services The instrument itself is not new the 1944 GI Bill of Rights was a voucher and vouchers for food college aid and housing have been in place for decades Until now however the study of vouchers has been restricted to a few controversial applications This volume which grew out of a conference sponsored by the Brookings Institution the Urban Institute and the Committee for Economic Development fills the gap offering a framework for comparative analysis of specific policy issues related to vouchers Its 16 essays address the economics politics and legal issues of voucher use and explore how vouchers are currently employed in the United States and abroad for education child care job training housing and health care C Eugene Steuerle is a senior fellow at the Urban Institute and has worked under four different U S presidents on a variety of reform issues in such areas as social security budget tax and health policy Robert D Reischauer a senior fellow in Economic Studies at the Brookings Institution was director of the Congressional Budget Office from 1989 to 1995 George Peterson is a senior fellow at the Urban Institute from 1976 to 1985 he directed the Institute's Public Finance Research Center Van Doorn Ooms senior vice president and director of research at the Committee for Economic Development was formerly executive director for policy and chief economist of the Committee on the Budget U S House of Representatives 1989 1990 and was the Budget Committee's chief economist from 1981 to 1988
