Introduction

Retailing is the process of selling consumer goods and services to the final customers through multiple distribution channels with the aim of earning profit. The distribution channels may include the internet, home shopping, door to door shopping and store outlet among others (Cox and Dannehl, 2017). Retail typically involves a service provider filling small orders for a large number of individuals who are the final consumers rather than filling large orders for few individuals in the market such as the government, corporations, and suppliers. In the modern market, retailers come up with the product mix which entails the product, the place, price, personnel, presentation, and promotion (Mayer, Melitz and Ottaviano, 2016). This is done by coming up with a strategic plan and decisions on the type of stores, the optimal product assortment, the market to be served and the overall market position. Besides, retailers in the modern market also offer retail support services to the customers such as advisory services, stylist services and provision of credit. Therefore, the main objective of this report is to analyze the key changes in the UK fashion retail market and how they affect New Look Company's growth and development in the market. The paper will also discuss on the strategies and tactics the company can use to cope up with the changes
