Information Appliances and Beyond Eric Bergman, 2000 A growing focus on product usability is creating demand for usability specialists and prompting companies of all kinds to hire developers and designers who are well versed in this way of thinking This book takes a look at the unique usability issues surround information appliances and other interactive consumer products

Internet Protocol 6 Julie C. Gaffin, 2007 The Internet Protocol IP is an international communications standard that is essential to the operation of both the public Internet and many private networks in existence today IP provides a standardised envelope that carries addressing routing and message handling information thereby enabling a message to be transmitted from its source to its final destination over the various interconnected networks that comprise the Internet The current generation of IP version 4 IPv4 has been in use for more than 20 years and has supported the Internet s rapid growth during that time With the transformation of the Internet in the 1990s from a research network to a commercialised network concerns were raised about the ability of IPv4 to accommodate anticipated increasing demand for Internet addresses In 1993 the Internet Engineering Task Force IETF began a design and standardisation process to develop a next generation Internet Protocol that would address among other issues

the predicted exhaustion of available IPv4 addresses The resulting set of standards collectively known as IP version 6 IPv6 was developed over the course of several years IETF a stable core of IPv6 protocols emerged by 1998 This book examines the technical and economic issues related to IPv6 adoption in the United States including the appropriate role of government international interoperability security in transition and costs and benefits of IPv6 deployment *Simplicity Marketing*
Steven M. Cristol, Peter Sealey, 2001-03-11 For more than half a century marketers have bombarded customers with more and more choices in products and services What is the result Unprecedented anxiety Our mental circuit breakers are on overload In fact pioneering brand strategists Steven M Cristol and Peter Sealey assert that we have reached our manageable threshold for making decisions and a watershed in product proliferation In this pathbreaking book the authors argue with compelling evidence that the next generation of marketing successes will belong to those brands that simplify customers lives or businesses in ways that are inextricably tied to brand and product positioning They contend that if a brand is not reducing customer stress it is creating it and it is vulnerable to losing market share to more customer empathetic competitors Writing especially for product or brand managers who are struggling to simplify their portfolios Cristol and Sealey have created a breakthrough framework that is itself a lesson in simplicity After presenting two essential guideposts for managers to assess where their brand sits on the stress spectrum the authors turn to the heart of *Simplicity Marketing* the 4 R s of simplification Replace Repackage Reposition and Replenish Using scores of real world company examples Cristol and Sealey show how each of the 4 R s interacts with the others in powerful ways to relieve customer stress and how these strategies may be executed individually or in combination to build brand loyalty Here for the first time are ten specific strategies to relieve customer stress through consolidating aggregating or integrating products and services repositioning brands for more relevance to stress reduction and decluttering customers decision making requirements The final pages of this brilliant manifesto for a simplicity revolution provide a guide to managing simplicity strategies leveraging information technology to simplify rather than complicate customers lives and integrating all the tools in the book into an executional blueprint *Advertiser's Weekly* ,1928
