QUERY CHAMELEON

When you possess a tool like Nexus, you have access to every system in your enterprise! The Nexus Query Chameleon is the only tool that works on all systems. Its Super Join Builder allows for the ERwin Logical Model to be loaded, and then Nexus shows tables and views visually. It then guides users to show what joins to what. As users choose the tables and columns they want in their report, Nexus builds the SQL for them with each click of the mouse. Nexus was designed for Teradata and Hadoop, but works on all platforms. Nexus even converts table structures between vendors, so querying and managing multi-vendor platforms is transparent. This is the 7th International Conference on Object Oriented Information Systems (OOIS) that focus on Object Oriented and Web Based Frameworks for Information Systems. In the last few years we've seen significant new development in this field from one off design technologies to reusable frameworks and from web applications to bioinformatic systems. We perceive that information processing is one of the most important activities of human beings. Object orientation and frameworks have been the main stream technologies for design and implementation of large scale and complex information systems. Recent research advances and industrial innovations in information systems modeling and Internet applications have explored the new trends in shifting information system vendors from component and system developers to services providers. Users of information systems are increasingly demanding higher performance, mobility and personalization in order to realize the dream to access and obtain necessary information anywhere and anytime. The new development requires the investigation of new architectures, frameworks, processes and inter connectivity of information systems at society, organization, team and personal levels. The OOIS 01 Proceedings has put together a program of 53 papers from leading researchers and practitioners in the field of object technology and information systems.
