Education Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child's first sense of self or the building of a first identity Because this is a crucial part of children's makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience

Methods in Educational Research Marguerite G. Lodico, Dean T. Spaulding, Katherine H. Voegtler, 2010-05-17 *Methods in Educational Research* *Methods in Educational Research* is designed to prepare students for the real world of educational research It focuses on scientifically based methods school accountability and the professional demands of the twenty first century empowering researchers to take an active role in conducting research in their classrooms districts and the greater educational community Like the first edition this edition helps students educators and researchers develop a broad and deep understanding of research methodologies It includes substantial new content on the impact of No Child Left Behind legislation school reform quantitative and qualitative methodologies logic modeling action research and other areas Special features to assist the teaching and learning processes include vignettes illustrating research tied to practice suggested readings at the end of each chapter and discussion questions to reinforce chapter content Praise for the Previous Edition A new attempt to make this subject more relevant and appealing to students Most striking is how useful this book is because it is really grounded in educational research It is very well written and quite relevant for educational researchers or for the student hoping to become one

PsycCRITIQUES American Psychological Association I applaud the authors for their attempt to cover a wide range of material The straightforward language of the book helps make the material understandable for readers *Journal of MultiDisciplinary Evaluation*

Language Awareness in Multilingual Classrooms in Europe Christine Hélot, Carolien Frijns, Koen Gorp, Sven Sierens, 2018-04-23 Within the scope of today's globalisation linguistic diversity is a given fact of the

world we live in In several educational contexts in Europe language awareness LA activities have been introduced with the objective to prepare pupils cognitively socially and or critically for life as multilingual open minded and or empowered citizens in a diverse world Despite previous research in various contexts the concept of LA remains problematic a generally accepted evidence based conceptualisation is missing This confronts both research and education with a challenge in order to develop LA activities implement them successfully in educational contexts and achieve the expected outcomes we should know what the concept stands for how it works and why we would choose to implement it in classrooms or not This volume focuses on three apparent simple questions what how and why The first question what refers to the concept ual mess of LA The second question how refers to the implementation of LA activities in several educational contexts The third question why is a recurrent theme running through all the chapters and deals with a reflection on the way we deal un consciously with LA activities in education
