Chemical Regulation: Observations on Improving the Toxic Substances Control Act John Stephenson, 2011 This is a print on demand edition of a hard to find publication The EPA is authorized under the Toxic Substances Control Act TSCA to obtain information on the risks of chemicals and to control those that it determines to pose an unreasonable risk EPA also conducts assessments of chemicals under its Integrated Risk Information System IRIS program Nonetheless EPA does not have sufficient information to determine whether it should establish controls to limit public exposure to many chemicals that may pose substantial health risks This testimony addresses EPA's implementation of TSCA and IRIS and options for 1 obtaining more information on chemical risks 2 controlling these risks and 3 sharing more of the information collected under TSCA

Sutton, Sam Dupont, Jose Martin Hernandez-Ayon, Xianghui Guo, 2025-04-15 Ocean acidification is a global phenomenon with local effects Marine ecosystems are facing multiple stressors leading to significant changes Time series observations are the basis to understand these changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean's ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean's health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge physical chemical and biological observations and their application for modeling and future projections *Biology* Kenneth Raymond Miller, Prentice Hall (School Division), 1999-02 *The Electrical Review*, 1897 **Exploring Human Biology in the Laboratory** Matthew M.
