Ocr A Level Exam Timetable 2014:

Forward with Classics Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re-entering the mainstream educational arena. Since 2012 there have been more students in state maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the state maintained sector. The teaching and learning of Latin and Greek is not however confined to the classroom: community based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success.

Teaching Classics with Technology, 2019-06-13 The impact of ICT on the teaching of classical languages, literature and culture has not until now been extensively described and evaluated. Nevertheless, educational technology has made a huge difference to the ways in which Classics is taught at junior, senior and college level. The book brings together twenty major approaches to the use of technology in the classroom and presents them for a wide international audience. It thus forms a record of current and developing practice, promotes further discussion and use among practitioners, teachers, learners and trainers, and offers suggestions for changes in pedagogical practices in the teaching of Classics for the better. The many examples of practice from both UK and US perspectives are applicable to countries throughout the world where Classics is being taught. The more traditional curricula of high school education in the UK and Europe are drawing more and more on edutech, whereas educational jurisdictions in the US are increasingly expecting high school students to use ICT in all lessons, with some actively dissuading schools from using traditional printed textbooks. This book presents school teachers with a vital resource as they adapt to this use of educational technology in Classics teaching. This is no less pertinent at university level in the UK and US where pedagogy tends to follow traditionalist paradigms; this book offers lecturers frameworks for understanding and assimilating the models of teaching and learning which are prevalent in schools and experienced by their students.

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE

English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual. Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding. The current status of Ofqual as an independent regulator accountable to Parliament is the right one. However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do.
