PROF. DR. CAPT. BİLAL KILIÇ,2020-11-03 Aircraft Accident Investigation Learning from Human and Organizational Factors provides a complete overview of the contributing factors to accidents and incidents in aviation and fundamentals of aircraft accident investigation While the book in your hands may be used in the form of a reference source at universities in terms of its contents it may also be used in the recurrent trainings of airlines as a supplementary source It is also a source of reference that may be individually used by those who are interested in aviation for the purpose of learning about the investigation methods and causes of accidents that have been experienced The accidents covered in the book are as follows British Airways Flight 38 Birgenair Flight 301 Korean Air Flight 801 Helios Airways Flight 552 Avianca Flight 052 Asiana Airlines Flight 214 Qantas Flight 32 Air France Flight 447 Air Florida Flight 90 Air France Flight 358 Colgan Air Flight 3407 Air Canada Flight 143 **Human Performance on the Flight Deck** Don Harris,2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system containing chapters on pilot selection simulation and training stress

fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area
