By claiming that it does not necessarily belong to any one mind in particular is inferring then that the self is not in fact a property. Then how can it be said to exist? Thomas Reid (Macquarie, lecture 17) also raises an important objection to Locke's theory of personal identity that seems fairly self-evident to me. We can consider a man as: a child, then in middle age and at old age. If the man in middle age can remember occurrences when he was a young boy, but now that he is an old man can't, then can he be considered a different person from the young boy?

Of Personal Identity Hume

According to Locke the old man is the same as the middle aged one, and the middle aged is the same as the child. Yet there is no continuity of consciousness between the three, any break in memory would render them a 'non-person' if we follow Locke's argument-clearly it is logically inconsistent. David Hume's 'bundle theory' of the self seems to me rather more logically coherent. He claimed that humans tend to think of themselves as the same person as they were, say, 10 years ago; that we believed that although one had evolved over the period in a number of ways that the self had endured.

According to Hume however, this was a mistake, and when examined empirically no more than a practical habit: "I never can catch myself at any time without a perception, and never observe anything but the perception"(TI, vi, p. 251). It is clear, posits Hume, our thoughts and perceptions flow from one idea to the next; so we encounter a 'bundle', or grouping, of perceptions throughout our life but no actual continuous and enduring underlying self- or "I" -as a 'unity of consciousness'.

While there is a stability of perceptions over the short term, and some loose association of experiences, there is no overarching continuity of "I" in reality. Hume agrees that we extend over time in actions, we begin a job and finish it some time later, and that our desires also extend in some sort of continuity over time. Furthermore our physical bodies endure reasonably consistently; we age gradually. This according to Hume is what ultimately defines our sense of personal identity. While Hume's theory of the self is attractive in my view, if anything it doesn't go far

Objects and Identity Harold W. Noonan, 2013-03-09 Identity has for long been an important concept in philosophy and logic Plato in his Sophist puts same among those forms which run through all others The scholastics inherited the idea and the terminology classifying same as one of the transcendentals i.e. as running through all the categories The work of Locke and Leibniz made the concept a problematic one But it is rather recently i.e. since the importance of Frege has been generally recognized that there has been a keen interest in the notion formulated by him of a criterion of identity This at first sight harmless as well as useful has proved to be like a charge of dynamite The seed had indeed been sown long ago by Euclid In Book V of his Elements he first gives a useless definition of a ratio A ratio is a sort of relation between two magnitudes in respect of muchness But then in definition 5 he answers not the question What is a ratio but rather What is it for magnitudes to be in the same ratio and this is the definition that does the work

Controversies and the Metaphysics of Mind Yaron M. Senderowicz, 2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the

theories **Handbook of Identity Theory and Research** Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22

Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines, identity researchers remain divided over such enduring fundamental questions as: What exactly is identity and how do identity processes function? Do people have a single identity or multiple identities? Is identity individually or collectively oriented? Personally or socially constructed? Stable or constantly in flux? The *Handbook of Identity Theory and Research* offers the rare opportunity to address the questions and reconcile these seeming contradictions, bringing unity and clarity to a diverse and fragmented literature. This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches. Contributing authors provide perspectives from psychology (e.g., narrative, social identity theory, neo-Eriksonian) and from other disciplines (e.g., sociology, political science, ethnic studies), and the editors highlight the links between chapters that provide complementary insights on related subjects. In addition to covering identity processes and categories that are well known to the field, the *Handbook* tackles many emerging issues, including: Identity development among adopted persons; Identity processes in interpersonal relationships; Effects of globalization on cultural identity; Transgender experience and identity; Consumer identity and shopping behavior; Social identity processes in xenophobia and genocide. The *Handbook of Identity Theory and Research* lends itself to a wealth of uses by scholars, clinicians, and graduate students across many disciplines, including social developmental and child school psychology, human development and family studies, sociology, cultural anthropology, gender, ethnic and communication studies, education, and counseling.
