

Day Or Night Shade With 2 Cords Restrunging Instructions

Before you begin, determine the type of shade (Day/Night, Night only or Day only) and the number of cords (two or four). You will need the following tools: scissors, flat head screwdriver and Phillips head screwdriver.

1. Pry the end caps on all rails loose with a flat head screwdriver. The rails slide off horizontally. If the bottom rail gets hung up on the knob rivet, be firm and it will slide off.
2. Cut off or remove cord retainers.
3. Pull out current cord from top rail.
4. Remove two cords from kit. Attach one cord to each side of the spring by tying a double knot.
5. Inspect the cord bushings in the fabric and if broken or worn, replace with supplied bushings.

6. Inspect the cord bushings in the fabric and if broken or worn, replace with supplied bushings. Carefully thread cord through bushing noting that the cord coming from the left will run down through the left side of the material. The cord coming from the right will run down through the right side of the fabric. A small piece of tape wrapped around the end of the cord will help.

7. The cords will cross in the bottom rail so that the cord that runs down the left-hand portion of the shade will cross over and now come out through the right-hand side of the bottom rail. Do the same procedure for the right-hand side of the shade. It will cross over in the bottom rail and come out through the left-hand side of the bottom rail.

8. Slide top rail back onto shade. Position the top rail so bracket groove is toward front of the shade. Reinstall top rail end caps.

9. Slide bottom rail back onto shade making sure the cords remain crossed.

10. Thread cord through the bottom rail end caps. Reinstall end caps.

11. Thread cord retainers onto end of cords. Flat side is top of cord retainer. Spool side is bottom of cord retainer. Thread cords up through spool side first and then back down through the flat side.

12. Thread cord retainers onto end of cords. Flat side is top of cord retainer. Spool side is bottom of cord retainer. Thread cords up through spool side first and then back down through the flat side.

13. With a tape measure, measure from the top of the top rail to desired drop of shade. Tie knots below cord retainer at that measurement.

14. Reinstall shade in window. Let entire shade drop. Screw each cord retainer into wall.

15. If shade does not stay in the upright position, you may need to increase the tension of the cords. Increase tension by retying knot in shorter position.
