Developing Future-ready Learners for a Global Age Suzanne S. Choo, Woon Chia Liu, Bee Leng Chua, 2024-12-02

Suzanne S Choo Woon Chia Liu and Bee Leng Chua offer a dynamic look into the tripartite relationship between education research policy and practice that characterizes Singapore's changing education landscape. Over the years, Singapore has garnered increasing attention internationally for its world-class education system. Pushing back against the stereotypical notions of exam and teacher-centric education in Asia, the contributors to this volume discuss opportunities as well as challenges in Singapore's innovation towards constructivist, critical, culturally responsive and cosmopolitan forms of learning. Highlighting the pedagogical innovation and its context in Singapore's teacher education and schools, the authors bridge theory and practice by providing an understanding of innovative practices informed by key shifts in Singapore's education policies and the key conceptual principles informing these practices. More importantly, it provides on-the-ground empirical insights into the ways these innovative pedagogical practices are enacted in the classroom and in teacher education programmes. Each chapter provides an in-depth understanding of how these pedagogies are applied across various subject disciplines including guided problem solving in Mathematics, games-based pedagogy in Science, multimodal literacies in language, ethical criticism in Literature, Nonlinear Pedagogy in Physical Education, multicultural approaches in music and dialogic pedagogy in drama among others. Balancing theoretical and empirical focus, this resourceful text will be of interest to students, researchers and practitioners in educational development, pedagogy and teacher education as well as policymakers across international fields in education.

[The Politics of Climate Change Knowledge](#) Nowrin Tabassum, 2022-03-03. This book addresses political knowledge of climate change and its relation to labelling people affected by climate change either as climate refugees or as climate change-induced displaced people or migrants. By questioning the knowledge of climate change and subsequent labelling of people, this book will spark debate in studies of global climate politics and transnational policy networks. Rather than considering the issue of climate change as a given phenomenon, the author explores how the politicized knowledge of climate change has been produced in international negotiations and how that knowledge is transmitted from global forums to local country levels via climate change action plans and resilience projects. This book introduces the concept of multi-scalar knowledge brokers (MKBs), individual actors who work at multiple levels: local, national and international, to transmit the knowledge of climate change from global level to local level. The author uses the primary case study of Bangladesh to demonstrate how the dominant actors in global climate politics, the Intergovernmental Panel on Climate Change (IPCC), the United Nations Framework Convention on Climate Change (UNFCCC) and the World Bank, as well as the USA and the UK, interact with the government and local NGOs in Bangladesh regarding transmitting the knowledge of climate change, labelling the uprooted people and implementing resilience projects. This book will be of interest to students, scholars and practitioners of international relations, environmental politics, climate change studies, political ecology, political
