Finishing First in Science Education Lillian Riggs Johnson,2024-03-12 School officials often examine teaching science from the perspective of the academic performance of K 12 children and the performance of the teacher But rarely do we see teacher preparation programs examined under the same scrutinization Finishing First in Science Education takes an inside view of these programs by transforming actual events into teaching case studies The case studies serve to encourage desirable skills within pre service teachers and teacher educators Employers all over the world desire creativity critical thinking collaboration and communication skills Educators can embrace these skills and emphasize them in teaching and learning

The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate Stephen J. Ceci,Wendy

M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science. Everyone is interested: academics, politicians, parents, high school girls and boys, women in search of college majors, administrators working to accommodate women's educational interests; the list goes on. But one thing often missing is an evidence-based examination of the problem, uninfluenced by personal opinions, accounts of lived experiences, anecdotes, and the always encroaching inputs of popular culture. This is why this special issue of *Frontiers in Psychology* can make a difference. In it, a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical, objective approaches to understanding women's underrepresentation in science today. The questions considered within this special issue span academic disciplines, methods, levels of analysis, and nature of analysis; what these articles share is their scholarly, evidence-based approach to understanding a key issue of our time.
