Physical Science Control Test No2 2014 Grade11:

Student Voices in Formative Assessment Feedback Pernille Fiskerstrand, Wenke Mork Rogne, Paul Kessler Rogers, Fabienne Van Der Kleij, 2025-10-23 This Research Topic seeks to bring forward new empirical research on students' experiences and emotions toward formative assessment feedback. Research on formative assessment has expanded considerably over the last decades. Lee et al 2020, Morris et al 2021, Shute 2008, and research has identified positive learning effects from the student's perspective. Weurlander et al 2012. However, in their extensive review, Van der Kleij and Lipnevich 2021 found that the field of students' perceptions of assessment feedback lacks clear definitions in addition to deeper relations to theory. Methodological shortcomings in self-reporting feedback studies are also found in Brown and Zhao 2023. Consequently, the relatively large body of research on the topic is isolated and diverse. As such, the existing research offers minimal understanding of the connection between students' perceptions of feedback, their engagement with it, and the outcome of the assessment feedback. Van der Kleij, Winstone. Elementary students' view of formative assessment processes and outcomes. Assessment environment for different groups/levels of students. Longitudinal perspectives on emotions towards formative assessment. Theoretical approaches to students' perceptions of assessment feedback. Students' view of the feedback process as generators of feedback. Students' experiences of use of AI in assessment.

Contemporary Curriculum John D. McNeil, 2014-11-17 The Eighth Edition of Contemporary Curriculum In Thought and Action prepares readers to participate in the discussion of curriculum control and other matters important to K-12 and university educators. The text highlights major philosophies and principles, examines conflicting conceptions of curriculum, and provides the intellectual and technical tools educators and administrators need for constructing and implementing curriculum.

Life by Algorithms Catherine Besteman, Hugh Gusterson, 2019-05-23 Essays on the downsides, dysfunctions, and dangers of automated decision making. An excellent survey of the algorithmically managed life. Choice: The phone systems that businesses use to screen calls. The link between student standardized test scores and public schools' access to resources. The algorithms that regulate patient diagnoses and reimbursements to doctors. The impenetrable corporate bureaucracy that can drive customers in need of help up the wall or drive them to suicide. The storage, sorting, and analysis of massive amounts of information have enabled the automation of decision making at an unprecedented level. Meanwhile, computers have offered a model of cognition that increasingly shapes our approach to the world. The proliferation of robo-processes is the result, as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide-ranging volume, which features contributions from a distinguished cast of scholars in anthropology, communications, international studies, and political science. Though automatic processes are designed to be engines of rational systems, the stories in Life by Algorithms reveal how they can in fact produce absurd, inflexible, or even dangerous outcomes. Joining the call for algorithmic transparency, the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance.
