Parliament. House of Commons,1918 *Linear Dynamical Systems on Hilbert Spaces: Typical Properties and Explicit Examples* S. Grivaux,É. Matheron,Q. Menet,2021-06-21 We solve a number of questions pertaining to the dynamics of linear operators on Hilbert spaces sometimes by using Baire category arguments and sometimes by constructing explicit examples In particular we prove the following results i A typical hypercyclic operator is not topologically mixing has no eigen values and admits no non trivial invariant measure but is densely distri butionally chaotic ii A typical upper triangular operator with coe cients of modulus 1 on the diagonal is ergodic in the Gaussian sense whereas a typical operator of the form diagonal with coe cients of modulus 1 on the diagonal plus backward unilateral weighted shift is ergodic but has only countably many unimodular eigenvalues in particular it is ergodic but not ergodic in the Gaussian sense iii There exist Hilbert space operators which are chaotic and U frequently hypercyclic but not frequently hypercyclic Hilbert space operators which are chaotic and frequently hypercyclic but not ergodic and Hilbert space operators which are chaotic and topologically mixing but not U frequently hypercyclic We complement our results by investigating the descriptive complexity of some natural classes of operators de ned by dynamical properties **Applied Mechanics Reviews** ,1969 Report Commonwealth Shipping Committee,1918 **Reports** Great Britain. Royal Commission on University Education in Wales,1918 **Keep Watching the Skies!** W. Patrick McCray,2021-08-10 When the Soviets launched Sputnik in 1957 thousands of ordinary people across the globe seized

the opportunity to participate in the start of the Space Age Known as the Moonwatchers these largely forgotten citizen scientists helped professional astronomers by providing critical and otherwise unavailable information about the first satellites In *Keep Watching the Skies* Patrick McCray tells the story of this network of pioneers who fueled by civic pride and exhilarated by space exploration took part in the twentieth century s biggest scientific endeavor Around the world thousands of teenagers homemakers teachers amateur astronomers and other citizens joined Moonwatch teams Despite their diverse backgrounds and nationalities they shared a remarkable faith in the transformative power of science a faith inspired by the Cold War culture in which they lived Against the backdrop of the space race and technological advancement ordinary people developed an unprecedented desire to contribute to scientific knowledge and to investigate their place in the cosmos Using homemade telescopes and other gadgets Moonwatchers witnessed firsthand the astonishing beginning of the Space Age In the process these amateur scientists organized themselves into a worldwide network of satellite spotters that still exists today Drawing on previously unexamined letters photos scrapbooks and interviews *Keep Watching the Skies* recreates a pivotal event from a perspective never before examined that of ordinary people who leaped at a chance to take part in the excitement of space exploration
