A Political Economy of Contemporary Capitalism and its Crisis Dimitris Sotiropoulos,John Milios,Spyros Lapatsioras,2013-06-19 The recent financial meltdown and the resulting global recession have rekindled debates regarding the nature of contemporary capitalism This book analyses the ongoing financialization of the economy as a development within capitalism and explores the ways in which it has changed the organization of capitalist power The authors offer an interpretation of the role of the financial sphere which displays a striking contrast to the majority of contemporary heterodox approaches Their interpretation stresses the crucial role of financial derivatives in the contemporary organization of capitalist power relations arguing that the process of financialization is in fact entirely unthinkable in the absence of derivatives The book also uses Marx s concepts and some of the arguments developed in the framework of the historic Marxist controversies on economic crises in order to gain an insight into the modern neoliberal form of capitalism and the recent financial crisis Employing a series of international case studies this book will be essential reading for all those with an interest in the financial crisis and all those seeking to comprehend the workings of capitalism

Science and Socio-Religious Revolution in India Pankaj Jain, 2016-12-19 Scholars have long noticed a discrepancy in the way non Western and Western peoples conceptualize the scientific and religious worlds Non Western traditions and communities such as of India are better positioned to provide an alternative to the Western dualistic thinking of separating science and religion The Himalayan Environmental Studies and Conservation Organization HESCO was founded by Dr Anil Joshi in the 1970s as a new movement looking at the economic and development needs of rural villages in the Indian Himalayas and encouraging them to use local resources in order to open up new avenues to self reliance This thoroughly revised text argues that the concept of dharma the law that supports the regulatory order of the universe in Indian culture can be applied as an overarching term for HESCO s socio economic work This book presents the social environmental work in contemporary India by Dr Anil Joshi in the Himalayas and by Baba Seechewal in Punjab combining the ideas of traditional and scientific ecological knowledge systems Based on these two examples the book presents the holistic model transcending the dichotomies of nature vs culture and science vs religion especially as practiced and utilized in the non Western society such as India Using the example of HESCO the book highlights that the very categories of religion and science are problematic when applied to non Western traditions but that Western technologies can be radically transformed through integration with regional legacies to enable the flourishing of a multiplicity of knowledge traditions and the societies that depend upon them It will be of interest to students and scholars of South Asian Studies Religion Environmental Studies Himalayan Studies and Development Studies

Coercive Care Bernadette Mcsherry, Ian Freckelton, 2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent

years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adult s care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition

The Soils of the Philippines
Rodelio B. Carating, Raymundo G. Galanta, Clarita D. Bacatio, 2014-04-23

The first soil survey in the Philippines was done by Mr Clarence Dorsey an American soil scientist in the province of Batangas in 1903 The Soils of the Philippines however is the first comprehensive summary of more than a century of soil survey work in this country It integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day The result is the first ever genetic key for classifying Philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements This book brings together discussions on soils and soil mapping units and up to date international techniques and technologies It makes soils relevant to current political realities and national issues As soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment The Soils of the Philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come With a vanishing breed of experienced soil surveyors not only in the Philippines but also worldwide it may remain the only book on Philippine soils for the next hundred years or more Since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world As the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the Philippines for example the Guadalupe series underlying the skyscrapers of Makati City are becoming extinct as a result of urban development Therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover
