Virtual, Augmented and Mixed Reality Randall Shumaker, Stephanie Lackey, 2015-07-20 This volume constitutes the refereed proceedings of the 7th International Conference on Virtual Augmented and Mixed Reality VAMR 2015 held as part of the 17th International Conference on Human Computer Interaction HCI 2015 held in Los Angeles CA USA in August 2015 The total of 1462 papers and 246 posters presented at the HCII 2015 conferences was carefully reviewed and selected from 4843 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 54 papers included in this volume are organized in the

following topical sections user experience in virtual and augmented environments developing virtual and augmented environments agents and robots in virtual environments VR for learning and training VR in Health and Culture industrial and military applications

Precision agriculture '23 John V. Stafford, 2023-08-14 Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment market forces quality requirements traceability vehicle guidance and crop management Sensors now in use in agriculture are generating Big Data leading to the use of machine learning and AI an increasing challenge for agriculture Research continues to be necessary and needs to be reported and disseminated to a wide audience These edited proceedings contain peer reviewed papers presented at the 14th European Conference on Precision Agriculture held in Bologna Italy The papers reflect the wide range of disciplines that impinge on precision agriculture technology crop science soil science agronomy information technology decision support remote sensing data analysis and others The broad range of research topics reported will be a valuable resource for researchers advisors teachers and professionals in agriculture long after the conference has finished

Image and Signal Processing Alamin Mansouri, Fathallah Nouboud, Alain Chalifour, Driss Mammass, Jean Meunier, Abderrahim El Moataz, 2016-05-06 This book constitutes the refereed proceedings of the 7th International Conference ICISP 2016 held in May June 2016 in Trois Rivières QC Canada The 40 revised full papers were carefully reviewed and selected from 83 submissions The contributions are organized in topical sections on features extraction computer vision and pattern recognition multispectral and color imaging image filtering segmentation and super resolution signal processing biomedical imaging geoscience and remote sensing watermarking authentication and coding and 3d acquisition processing and applications

Computer Vision-Based Agriculture Engineering Han Zhongzhi, 2019-09-16 In recent years computer vision is a fast growing technique of agricultural engineering especially in quality detection of agricultural products and food safety testing It can provide objective rapid non contact and non destructive methods by extracting quantitative information from digital images Significant scientific and technological advances have been made in quality inspection classification and evaluation of a wide range of food and agricultural products Computer Vision Based Agriculture Engineering focuses on these advances The book contains 25 chapters covering computer vision image processing hyperspectral imaging and other related technologies in peanut aflatoxin peanut and corn quality varieties and carrot and potato quality as well as pest and disease detection Features Discusses various detection methods in a variety of agricultural crops Each chapter includes materials and methods used results and analysis and discussion with conclusions Covers basic theory technical methods and engineering cases Provides comprehensive coverage on methods of variety identification quality detection and detection of key indicators of agricultural products safety Presents information on technology of artificial intelligence including deep learning and transfer learning Computer Vision Based Agriculture Engineering is a summary of the author's work over the past 10 years Professor Han has presented his most recent research results in all 25 chapters of this book This unique work

provides students engineers and technologists working in research development and operations in agricultural engineering with critical comprehensive and readily accessible information It applies development of artificial intelligence theory and methods including depth learning and transfer learning to the field of agricultural engineering testing

Recent Advances in Environmental Science from the Euro-Mediterranean and Surrounding Regions Amjad Kallel, Mohamed Ksibi, Hamed Ben Dhia, Nabil Khélifi, 2017-12-12 This volume includes the papers presented during the 1st Euro Mediterranean Conference for Environmental Integration EMCEI which was held in Sousse Tunisia in November 2017 This conference was jointly organized by the editorial office of the Euro Mediterranean Journal for Environmental Integration in Sfax Tunisia and Springer MENA Publishing Program in Germany It aimed to give a more concrete expression to the Euro Mediterranean integration process by supplementing existing North South programs and agreements with a new multilateral scientific forum that emphasizes in particular the vulnerability and proactive remediation of the Euro Mediterranean region from an environmental point of view This volume gives a general and brief overview on current research focusing on emerging environmental issues and challenges and its applications to a variety of problems in the Euro Mediterranean zone and surrounding regions It contains over five hundred and eighty carefully refereed short contributions to the conference Topics covered include 1 innovative approaches and methods for environmental sustainability 2 environmental risk assessment bioremediation ecotoxicology and environmental safety 3 water resources assessment planning protection and management 4 environmental engineering and management 5 natural resources characterization assessment management and valorization 6 intelligent techniques in renewable energy biomass wind waste solar 7 sustainable management of marine environment and coastal areas 8 remote sensing and GIS for geo environmental investigations 9 environmental impacts of geo natural hazards earthquakes landslides volcanic and marine hazards and 10 the environmental health science natural and social impacts on Human health Presenting a wide range of topics and new results this edited volume will appeal to anyone working in the subject area including researchers and students interested to learn more about new advances in environmental research initiatives in view of the ever growing environmental degradation in the Euro Mediterranean region which has turned environmental and resource protection into an increasingly important issue hampering sustainable development and social welfare
