Place Value Task Cards:

Transition Math Task Cards ETC Montessori Digital, More and more students are moving into the upper elementary classroom without having achieved abstraction in multiplication and as a result are not introduced to the whole number division sequence Furthermore we found that students continue to be weak in their multiplication facts particularly those facts pertaining to 6s 7s 8s and 9s This lack of achievement in abstraction and consequential weakness in understanding results in the inability of children to participate in more advanced multiplication presentations Our findings are particularly problematic since the mathematical sequence for both the advanced fractions and decimals assumes mastery of all whole number operations Having taken all of these facts into consideration we designed the Transition Math Task Cards for Level 9 12 With the understanding that teachers must bridge these gaps while meeting math standards we believe that this program is a viable sequence to help children move forward The task cards provide ample opportunities for fact acquisition and pertinent mathematical comprehension of what happens when multiplying by factors of ten Children are also introduced to single and double digit division allowing them to understand the relationship that exists between the two operations

Mine the Gap for Mathematical Understanding, Grades K-2 John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K 2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers *Mine the Gap for Mathematical Understanding* is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality

and clarity of students understanding and better at planning teaching based on the gaps you see
