A Case Study of the Implementation of Joint Planning in an Organization Undergoing Transformation to Joint Force Headquarters in One State Stephen G. Lind, U.S. Army Command and General Staff College, 2008 Case Study of Joint Planning Implementation in an Organization Undergoing Transformation to Joint Force Headquarters in One

State Stephen G. Lind, 2008 The National Guard has been in a nearly constant state of change in one form or another since its inception The events that have transpired since the attacks on the World Trade Center on 11 September 2001 demonstrated the need for the next major evolution of the National Guard The National Guard began the process of transforming the State Military Headquarters in all 54 states and territories by converting from an Administrative and Oversight Headquarters to a Joint Operational Activity in 2003 This study investigates the changes brought about by the implementation of the joint planning process with relation to the transformation to Joint Force headquarters in California It explores the impact of the joint planning process to current operational plans within California and the challenges and successes experienced during the process In doing so it focuses on the effects the JFHQ transformation process has had in California One critical component to operating in a joint environment is the ability for the organization to conduct Joint Planning using the Joint Operation Planning and Execution System JOPES format All of the existing plans for each state would have to be updated and converted to the JOPES format adding to the challenges of learning a new planning format and training planners to use the new format This study finds that resourcing has been the most significant challenge to the transformation process with regards to joint planning The planning staff within the J 5 has suffered from a lack of sufficient personnel to conduct both strategic and operational planning simultaneously Strategic planning has been extremely effective while operational planning has produced mixed results Personnel within the joint staff have not been trained on the Joint Operations Planning Process JOPP which further hampers its operational planning capability The lack of trained planners has slowed attempts to update and transition current on the shelf plans from

The Management of Security Cooperation ,2017 **Strategy** Richard J Bailey, James W Forsyth, Mark O Yeisley, 2016-04-15 How does one engage in the study of strategy Strategy Context and Adaptation from Archidamus to Airpower argues that strategy is not just concerned with amassing knowledge it is also about recognizing our imperfect understanding of the environment and respecting the complex nature of adaptation to the unforeseen or unexpected In essence the strongest strategists are those who commit to an education that cultivates a more holistic and adaptive way of thinking With that thought in mind the contributors to Strategy each a current or former professor at the School of Advanced Air and Space Studies widely considered the Department of Defense s premier school of strategy offer ways of thinking strategically about a variety of subject matters from classical history to cyber power Practitioners in the profession of arms perhaps more than any other profession must employ critical thinking where the application of power on land at sea in the air and in space and cyberspace are concerned Strategy examines various sub disciplines regarding the use of power and illuminates different approaches to thinking which have implications beyond the implementation of force

Quantitative Intelligence Analysis Edward Waltz,2014-10-16

Quantitative Intelligence Analysis describes the model based method of intelligence analysis that represents the analyst's mental models of a subject as well as the analyst's reasoning process exposing what the analyst believes about the subject and how they arrived at those beliefs and converged on analytic judgments. It includes specific methods of explicitly representing the analyst's mental models as computational models, dynamic simulations and interactive analytic games, the structure of an analyst's mental model and the theoretical basis for capturing and representing the tacit knowledge of these models explicitly as computational models, detailed description of the use of these models in rigorous structured analysis of difficult targets, model illustrations and simulation descriptions, the role of models in support of collection and operations case studies that illustrate a wide range of intelligence problems, and a recommended curriculum for technical analysts.
