Educational Assessment

Robert J. Wright,2008 Educational Tests and Measurements in the Age of Accountability is a core text for use in a first level graduate course in educational measurement and testing In addition to covering the topics traditionally found in core textbooks for this course this text also provides coverage of contemporary topics including national testing programs international achievement comparisons the value added assessment of schools and teachers and the public policy debate on selective admissions vs affirmative minority enrollment *Parent's Guide to Standardized Tests for Grades 3-5* Cynthia Johnson,Drew Johnson,2003 Kaplan now offers an indispensable tool for parents who want to help their elementary school child perform well on standardized tests **Linking and Aligning Scores and Scales** Neil J. Dorans,Mary Pommerich,Paul W. Holland,2007-10-15 In their preface to the second edition of Test Equating Scaling and Linking Mike Kolen and Bob Brennan 2004 made the following observation Prior to 1980 the subject of equating was ignored by most people in the measurement community except for psychometricians who had responsibility for equating p vii The authors went on to say that considerably more attention is now paid to equating indeed to all forms of linkages between tests and that this increased attention can be attributed to several factors 1 An increase in the number and variety of testing programs that use multiple forms and the recognition among professionals that these multiple forms need to be linked 2 Test developers and publishers in response to critics often refer to the role of linking in reporting scores 3 The accountability movement and fairness issues related to assessment have become much more visible Those of us who work in this field know that ensuring comparability of scores is not an easy thing to do Nonetheless our customers the test takers and score users either assume that scores on different forms of an assessment can be used interchangeably or like the critics above ask us to justify our comparability assumptions And they are right to do this After all the test scores that we provide have an impact on decisions that affect people's choices and their future plans From an ethical point of view we are obligated to get it right **Schoolwide Action Research for Professional Learning Communities** Karl H. Clauset,Dale W. Lick,Carlene U. Murphy,2008-05-15 Discover how Whole Faculty Study Groups WFSGs use collaborative action research to involve an entire professional learning community in improving staff and school performance Test Scoring David Thissen,Howard Wainer,2001-05 Test Scoring provides a summary of traditional true score test theory and modern item response theory related to scoring tests as well as novel developments resulting from the integration of these approaches The background material introduced in the first four chapters builds a foundation for the new developments covered in later chapters These new methods offer alternative psychometric approaches to scoring complex assessments Each of the book's contributors draws from the classic literature of traditional test theory as well as psychometric developments of the past decade The emphasis is on large scale educational measurement but the topics and procedures may be applied broadly within many measurement contexts Numerous graphs

and illustrative examples based on real tests and actual data are integrated throughout This multi authored volume shows the reader how to combine the coded outcomes on individual test items into a numerical summary about the examinee s performance This book is intended for researchers and students in education and other social sciences interested in educational assessment and policy the design and development of tests and the procedures for test administration and scoring Prerequisites include an introduction to educational and psychological measurement and basic statistics Knowledge of differential and integral calculus and matrix algebra is helpful but not required Emerging Trends in Education Policy Theodore S.
