Science Colonialism And Indigenous Peoples Laurelyn Whitt:

Science, Colonialism, and Indigenous Peoples Laurelyn Whitt, 2009-08-24 At the intersection of indigenous studies science studies and legal studies lies a tense web of political issues of vital concern for the survival of indigenous nations Numerous historians of science have documented the vital role of late eighteenth and nineteenth century science as a part of statecraft a means of extending empire This book follows imperialism into the present demonstrating how pursuit of knowledge of the natural world impacts and is impacted by indigenous peoples rather than nation states In extractive biocolonialism the valued genetic resources and associated agricultural and medicinal knowledge of indigenous peoples are sought legally converted into private intellectual property transformed into commodities and then placed for sale in genetic marketplaces Science Colonialism and Indigenous Peoples critically examines these developments demonstrating how contemporary relations between indigenous and Western knowledge systems continue to be shaped by the dynamics of power the politics of property and the apologetics of law

The Greater Plains Brian Frehner, Kathleen A. Brosnan, 2021-07 The Greater Plains tells a new story of a region stretching from the state of Texas to the province of Alberta where the environments are as varied as the myriad ways people have inhabited them These innovative essays document a complicated history of human interactions with a sometimes plentiful and sometimes foreboding landscape from the Native Americans who first shaped the prairies with fire to twentieth century oil regimes whose pipelines linked the region to the world The Greater Plains moves beyond the narrative of ecological desperation that too often defines the region in scholarly works and in popular imagination Using the lenses of grasses animals water and energy the contributors reveal tales of human adaptation through technologies ranging from the travois to bookkeeping systems and hybrid wheat Transnational in its focus and interdisciplinary in its scholarship The Greater Plains brings together leading historians geographers anthropologists and archaeologists to chronicle a past rich with paradoxical successes and failures conflicts and cooperation but also continual adaptation to the challenging and ever shifting environmental conditions of the North American heartland

Global Histories of Disability, 1700-2015 Esme Cleall, 2022-12-30 This book offers a global angle to Disability History by exploring global

locations as disparate as the Caribbean Kenya Mauritius Natal and Poland as well as taking new approaches to Britain and the US Global Histories of Disability seeks to address issues including colonialism disability the body forced labour and indigeneity A further key issue that reoccurs throughout the volume is the specificity of place With several chapters examining the Global South such work challenges the implicit tendency to assume that the western experience of disability is a universal one The volume intends to do more than add new case studies to our knowledge about disability in the modern period it intends to use the insights gained from examining disparate global sites to think more about the global histories of disability both empirically and theoretically Issues addressed by different chapters include colonialism imperialism disability deafness the body enslavement labour and indigeneity Different chapters also use economic cultural legal and political frameworks to explore issues of disability across a range of global locations This volume is essential for students scholars and researchers alike interested in world and international history

Indigenous Peoples' Cultural Property Claims Karolina Kuprecht, 2013-11-19 This book analyses the legal aspects of international claims by indigenous peoples for the repatriation of their cultural property and explores what legal norms and normative orders would be appropriate for resolving these claims To establish context the book first provides insights into the exceptional legislative responses to the cultural property claims of Native American tribes in the United States and looks at the possible relevance of this national law on the international level It then shifts to the multinational setting by using the method of legal pluralism and takes into consideration international human rights law international cultural heritage law the applicable national laws in the United Kingdom France and Switzerland transnational law such as museum codes and decision making in extra legal procedures In the process the book reveals the limits of the law in dealing with the growing imperative of human rights in the field and concludes with three basic insights that are of key relevance for improving the law and decision making with regard to indigenous peoples cultural property

Research Methods in Environmental Law Andreas Philippopoulos-Mihalopoulos, Victoria Brooks, 2017-11-24 This timely Handbook brings innovative free thinking and radical approaches to research methods in environmental law With a comprehensive approach it brings together key concepts such as sustainability climate change activism education and Actor Network Theory It considers how the Anthropocene subjects environmental law to critique and to the needs of the variety of bodies human and non human that require its protection This much needed book provides a theoretically informed analysis of methodological approaches in the discipline such as constitutional analysis rights based approaches spatial geographical analysis immersive methodologies and autoethnography which will aid in the practical critique and re imagining of Environmental Law

Justice in a New World Brian P Owensby, Richard J Ross, 2019-01-15 A historical and legal examination of the conflict and interplay between settler and indigenous laws in the New World As British and Iberian empires expanded across the New World differing notions of justice and legality played out against one another as settlers and indigenous people sought to negotiate their relationship In order

for settlers and natives to learn from maneuver resist or accommodate each other they had to grasp something of each other's legal ideas and conceptions of justice This ambitious volume advances our understanding of how natives and settlers in both the British and Iberian New World empires struggled to use the other's ideas of law and justice as a political strategic and moral resource In so doing indigenous people and settlers alike changed their own practices of law and dialogue about justice Europeans and natives appealed to imperfect understandings of their interlocutors notions of justice and advanced their own conceptions during workaday negotiations disputes and assertions of right Settlers and indigenous peoples legal presuppositions shaped and sometimes misdirected their attempts to employ each other's law Natives and settlers construed and misconstrued each other's legal commitments while learning about them never quite sure whether they were on solid ground Chapters explore the problem of legal intelligibility How and to what extent did settler law and its associated notions of justice become intelligible tactically technically and morally to natives and vice versa To address this question the volume offers a critical comparison between English and Iberian New World empires Chapters probe such topics as treaty negotiations land sales and the corporate privileges of indigenous peoples Ultimately Justice in a New World offers both a deeper understanding of the transformation of notions of justice and law among settlers and indigenous people and a dual comparative study of what it means for laws and moral codes to be legally intelligible
