Month, Day, Year

Table of Contents

List the sections of your paper and the page numbers where they begin. Then list them in and until you write or type your final draft to be sure of the page numbers.

Problem.....	Page.....
Purpose.....	Page.....
Hypothesis.....	Page.....
Materials.....	Page.....
Procedure.....	Page.....
Data/Results.....	Page.....
Conclusion.....	Page.....
Bibliography.....	Page.....

Problem:

What question are you trying to answer?

Purpose:

What do you want to do this project?

Hypothesis:

What do you think will happen? Make an educated guess. State your results in numbered form (one, two, three, four, etc.).

Research:

Find and summarize information that is important to your question.

Cite all your sources in your final bibliography.

Conclusion:

Start with a sentence using "Hence, in conclusion, etc."

This section is your evaluation and interpretation of your results. Look over your graphs, charts, tables, or data log and then write what you think the data shows or seems to indicate. You may include your opinion. But it is best to admit where you might have made mistakes. Negative results are not bad if you did not prove your hypothesis. Then say so. What would you do differently next time?

Materials:

List all the materials/equipment you need.

If you constructed any materials, explain how to do it.

Procedure:

Explain step by step what you did in your experiment. Be clear about the variables (the elements of the experiment that changed) and the control (the elements that don't change). Be very specific about how you measured the results. The procedure should be like a recipe. It should be clear, direct, brief, on separate pages and include them in this section.

Data/Results:

Your project MUST include a data table and graph. Make sure that you label your graphs clearly so that the reader can understand them. Refer back to the sample graphs.

The Results section, in paragraph form, what is shown in the data tables and graphs.

Abstract:

The abstract is a shortened version of your entire paper. It should include information about yourself at the top, name, school, grade in school, and subject of your project. Write 1-2 short paragraphs. Include: The purpose, the procedure, the results, and the conclusion. Use transitions between the information. Include 1-2 direct quotes from your research. Simply summarize the report. The entire abstract should be about one to two pages and fit on one page. It is easier to write the ABSTRACT after you have written the entire research paper to keep every fact. You should use a graphic organizer to organize information. Use the correct scientific words.

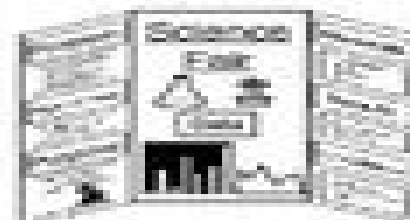

Bibliography:

This is a list of all used three books, magazines, websites, articles, and other information of sources that you used for conducting your topic and writing your paper. They are written in alphabetical in this form:
Last name of author, First name, Title of source, Date published, Place Published, Publisher, page numbers used.
