Science and the Secrets of Nature William Eamon, 2020-06-30 By explaining how to sire multicolored horses produce nuts without shells and create an egg the size of a human head Giambattista Della Porta's Natural Magic 1559 conveys a fascination with tricks and illusions that makes it a work difficult for historians of science to take seriously Yet according to William Eamon it is in the how to books written by medieval alchemists magicians and artisans that modern science has its roots These compilations of recipes on everything from parlor tricks through medical remedies to wool dyeing fascinated medieval intellectuals because they promised access to esoteric secrets of nature In closely examining this rich but little known source of literature Eamon reveals that printing technology and popular culture had as great if not stronger an impact on early modern science as did the traditional academic disciplines **Burdens of Proof** Jean-Francois Blanchette, 2012-04-27 An examination of the challenges of establishing the authenticity of electronic documents in particular the design of a cryptographic equivalent to handwritten signatures The gradual disappearance of paper and its familiar evidential qualities affects almost every dimension of contemporary life From health records to ballots almost all documents are now digitized at some point of their life cycle easily copied altered and distributed In Burdens of Proof Jean-François Blanchette examines the challenge of defining a new evidentiary framework for electronic documents focusing on the design of a digital equivalent to handwritten signatures From the blackboards of mathematicians to the halls of legislative assemblies Blanchette traces the path of such an equivalent digital signatures based on the mathematics of public key cryptography In the mid 1990s cryptographic signatures formed the centerpiece of a worldwide wave of legal reform and of an ambitious cryptographic research agenda that sought to build privacy anonymity and accountability into the

very infrastructure of the Internet Yet markets for cryptographic products collapsed in the aftermath of the dot com boom and bust along with cryptography's social projects Blanchette describes the trials of French bureaucracies as they wrestled with the application of electronic signatures to real estate contracts birth certificates and land titles and tracks the convoluted paths through which electronic documents acquire moral authority These paths suggest that the material world need not merely succumb to the virtual but rather can usefully inspire it Indeed Blanchette argues in renewing their engagement with the material world cryptographers might also find the key to broader acceptance of their design goals

Expérience et écriture mystiques dans les religions du livre Paul B. Fenton, Roland Goetschel, 2000 The present volume deals with the phenomenon of Writing and the Mystical Experience in Judaism Christianity and Islam Particular emphasis is laid on this theme within Jewish mysticism in the various stages of its historical development Methodological and phenomenological studies deal with the question in Antiquity the Mediaeval period and Modern times A Catalogue of Books, Including the Libraries of the Rev. Francis Blackburne, ... the Rev. Richard Ward, ... and Several Other Collections: ... Which are Now Selling, 1789 ... by Thomas and John Egerton, ... Thomas and John Egerton (Firm), 1789 Disrupted Patterns, 2022-03-07 This collection of essays explores the significance of modern chaos theory as a new paradigm in literary studies and argues for the usefulness of borrowings from one discipline to another Its thesis is that external reality is real and is not merely a social construct On the other hand this volume reflects the belief that literature as a social and cultural construct is not unrelated to that external reality The authors represented here furthermore believe that learning to communicate across disciplinary divides is worth the risk of looking silly to purists and dogmatists In applying a contemporary scientific grid to a by gone era the authors play out Steven Weinberg's exhortation to mind the clues to the past that cannot be obtained in any other way It is of course necessary to get the science right yet the essays in this collection do not seek to do science but rather to suggest that science and literature often share common assumptions and realities Thus there is no attempt to legitimize literary study through the adoption of a scientific approach Interaction between the disciplines requires mutual respect and a willingness to investigate the broader implications of scientific research Consequently this volume will be of interest to students and scholars of the long eighteenth century whether the focus is on England Locke Milton Radcliffe Lewis France Cr billion Diderot Marivaux Montesquieu or Germany Kant Moritz Goethe Fr Schlegel Moreover given its multiple thrust in employing mythological philosophical and scientific notions of chaos this volume will appeal to historians and philosophers of the European Enlightenment as well as to literary historians The volume ultimately aspires to promote communication across centuries and across disciplines **A catalogue of books** Thomas and John Egerton, 1790 *Etudes rabelaisiennes*, 1976 *Réflexions Stratégiques Sur Haïti* Luc Rémy, 2013-01-15 Dans R flexions Strat giques sur Ha ti Sauvons un Patrimoine Universel en P ril Luc R my offre une remarquable lecture ha tiano centriste de la Politique Internationale Il la construit autour de trois points cl 1 le cadeau de la R volution ha tienne d
