Searching For The Sun English Edition:

The Search for Neofascism A. James Gregor, 2006-03-27 Publisher description *In Search of Origins* Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term's connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begins with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter *The Search for the Beautiful Woman* Kyō Chō, 2012 For centuries Japanese culture including ideals of feminine beauty was profoundly shaped by China In this first full comparative history on the subject Cho Kyo explores changing standards of beauty in China and Japan ranging from plumpness to bound feet to blackened teeth Drawing on a rich array of sources gathered over a decade of research he considers which Chinese representations were rejected or accepted and transformed in Japan He then traces the introduction of Western aesthetics

into Japan starting in the Meiji era leading to slowly developing but radical changes in the representation of the search party

The Search Party George A. Birmingham, 1913 The Baptist Magazine, 1846 Search Algorithm Dinesh G. Harkut, 2023-02-01 Algorithms particularly those embedded in search engines social media platforms recommendation systems and information databases play an increasingly important role in selecting what information is most relevant to us which is a crucial feature of our participation in public life These algorithms are not just helpful in our daily lives but are also one of the unavoidable necessities of modern living This book discusses advances and applications of various types of search algorithms such as quantum search harmony search cognitive search genetic search and many others It is a valuable resource and provides a solid technical base for frontline investigations of search algorithms for scientists and students interested in search and optimization methods

In Search of William Gascoigne David Sellers, 2012-08-09 William Gascoigne c 1612-44 was the inventor of the telescopic sight and micrometer instruments crucial to the advance of astronomy His name is now known to historians of science around the world For some considerable time after his tragic death at the age of 32 in the English Civil War however it seemed as if his achievements would be consigned to oblivion Most of his papers were lost and even the few that survived have largely disappeared This is the story of how his work was rescued Into this story is woven an account of the state of astronomy and optics during Gascoigne's lifetime so that the reader can appreciate the significance of his discoveries
