Grand Challenges in the Field of Earth Science

Collaborative, 2015-11-23 Frontiers in Earth Science is an open access journal that aims to bring together and publish on a single platform the best research dedicated to our planet. This platform hosts all the rapidly growing and continuously expanding domains in Earth Science involving the lithosphere including geology, geophysics, geochemistry, and geography; the hydrosphere including hydrology and cryospheric marine and ocean sciences; complementing the existing Frontiers journal on Marine Science and the atmosphere including meteorology and climatology. As such, Frontiers in Earth Science focuses on the countless processes operating within and among the major spheres constituting our planet. In turn, the understanding of these processes provides the theoretical background to better use the available resources and to face the major environmental challenges including earthquakes, tsunamis, eruptions, floods, landslides, climate changes, sea level rise, extreme meteorological events. This is where interdependent processes meet, requiring a holistic view to better live on and with our planet. Within this volume are included the Grand Challenge papers for the Earth Science field authored by the Field Chief Editor and several of the 16 online specialty sections authored by the respective Chief Editors. These articles identify and describe the crucial challenges for Earth Science at the dawn of the 21st century.

Cancer, Radiation Therapy, and the

Market Barbara Bridgman Perkins, 2017-08-16 Appraising cancer as a major medical market in the 2010s. Wall Street investors placed their bets on single technology treatment facilities costing 100-300 million each. Critics inside medicine

called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems
