Threshold Concepts in Practice Ray Land, Jan H. F. Meyer, Michael T. Flanagan, 2016-07-09 *Threshold Concepts in Practice* brings together fifty researchers from sixteen countries and a wide variety of disciplines to analyse their teaching practice and the learning experiences of their students through the lens of the Threshold Concepts Framework. In any discipline there are certain concepts the jewels in the curriculum whose acquisition is akin to passing through a portal. Learners enter new conceptual and often affective territory. Previously inaccessible ways of thinking or practising come into view without which they cannot progress and which offer a transformed internal view of subject landscape or even world view. These conceptual gateways are integrative, exposing the previously hidden interrelatedness of ideas and are irreversible. However, they frequently present troublesome knowledge and are often points at which students become stuck. Difficulty in understanding may leave the learner in a liminal state of transition, a betwixt and between space of knowing and not knowing where understanding can approximate to a form of mimicry. Learners navigating such spaces report a sense of uncertainty, ambiguity, paradox, anxiety, even chaos. The liminal space may equally be one of awe and wonderment. Thresholds research identifies these spaces as key transformational points crucial to the learner's development but where they can oscillate and remain for considerable periods. These spaces require not only conceptual but ontological and discursive shifts. This volume, the fourth in a tetralogy on Threshold Concepts, discusses student experiences and the curriculum interventions of their teachers in a range of disciplines and professional practices including medicine, law, engineering, architecture and military education. Critical Pedagogies in Physical Education, Physical Activity and Health Julie Stirrup, Oliver Hooper, 2021-07-29 *Critical Pedagogies in Physical Education: Physical Activity and Health* explores critical pedagogy and critical work around the body, health and physical activity within physical education. By examining the complex relationships between policies and practice and how these are experienced by young people, it elucidates the need for critical pedagogy in contemporary times. With contributions from leading international experts in health and physical education and underpinned by a critical socio-cultural approach, the book examines how health and physical education are situated across various international contexts and the influence of policy and curriculum. It explores how health is constructed by students and teachers within these contexts as well as how wider spaces and places beyond formal schooling influence learning around the body, health and physical activity. Finally, it considers what progressive pedagogies might look like within health and physical education. Chapters utilise empirical work within the field to explore various topics of relevance to critical pedagogy, drawing on theoretical insights while providing practical applications and concluding with reflection points to encourage readers to consider the relevance for their own contexts. Designed to support pedagogical study in a range of contexts, this book will be of particular interest to undergraduate and postgraduate students.
