Physical Science Paper 2 2013 September:

, Can Science Fix Climate Change? Mike Hulme, 2014-06-04 Climate change seems to be an insurmountable problem Political solutions have so far had little impact Some scientists are now advocating the so called Plan B a more direct way of reducing the rate of future warming by reflecting more sunlight back to space creating a thermostat in the sky In this book Mike Hulme argues against this kind of hubristic techno fix Drawing upon a distinguished career studying the science politics and ethics of climate change he shows why using science to fix the global climate is undesirable ungovernable and unattainable Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks improving regional air quality and driving forward an energy technology transition Seeking to reset the planet s thermostat is not the answer **Handbook of the Politics of the Arctic** Leif Christian Jensen, Geir

Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries **Educational**

Assessment Christine Harrison, Constant Leung, David Pepper, 2023-10-19 This book explores and builds on the extraordinary work of Professor Paul Black across assessment and pedagogy across the curriculum including STEM humanities and social science subjects This book explores the influence that Black has had within educational settings focusing on interpretations of the work and scholarship he has achieved across a range of settings and on the ways scholars who have worked with him or been influenced by his ideas have developed their research and teaching The contributions are presented under three thematic sections each of which reflects a set of shared educational concerns and values drawing on the natural and social sciences and developments in public policy These concerns and values with their emphasis on teacher assessment provide a basis for a strategic informed and coherent response to challenges in education such as the cancellation of public examinations in the face of the Covid 19 pandemic The Secure and the Dispossessed Nick

Buxton, Ben Hayes, 2015-11-20 While the world s scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately
