Planet Earth Units Of Work:

Collected Works of Velimir Khlebnikov: Letters and theoretical writings Велимир Хлебников, 1987 Dubbed by his fellow Futurists the King of Time Velimir Khlebnikov 1885 1922 spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history the correspondence between human behavior and the language of the stars The result was a vast body of poetry and prose that has been called hermetic incomprehensible even deranged Of all this tragic generation of Russian poets including Blok Esenin and Mayakovsky Khlebnikov has been perhaps the most praised and the more censured This first volume of the Collected Works an edition sponsored by the Dia Art Foundation will do much to establish the counterimage of Khlebnikov as an honest serious writer The 117 letters published here for the first time in English reveal an ebullient humane impractical but deliberate working artist We read of the continuing involvement with his family throughout his vagabond life pleas to his smartest sister Vera to break out of the mold pleas to his scholarly father not to condemn and to send a warm overcoat the naive pleasure he took in being applauded by other artists his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti a first draft of his famous zoo poem O Garden of Animals his seriocomic but ultimately shattering efforts to be released from army service his inexhaustibly courageous confrontation with his own disease and excruciating poverty and always his deadly earnest attempt to make sense of numbers language suffering politics and the exigencies of publication The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output In the scientific articles written before 1910 we discern foreshadowings of major patterns of later poetic work In the pan Slavic proclamations of 1908 1914 we find explicit connections between cultural roots and linguistic ramifications In the semantic excursions beginning in 1915 we can see Khlebnikov's experiments with consonants nouns and definitions spelled out in accessible if arid form The essays of 1916 1922 take us into the future of Planet Earth visions of universal order and accomplishment that no longer seem so farfetched but indeed resonate for modern readers
