

CORE Phonics Survey

WHAT

The *CORE Phonics Survey* assesses the phonics and phonics-related skills that have a high rate of application in beginning reading. Each survey presents a number of lists of letters and words for the student to identify or decode. Pseudowords, or made-up words, are included since the student must use decoding skills to correctly pronounce these words and cannot have memorized them. These assessments are best used to plan instruction for students in the primary grades and to develop instructional groups. They may be administered every four to six weeks.

WHY

A student's ability to use knowledge of sound/letter correspondences (phonics) to decode words determines, in large measure, his or her ability to read individual words. A detailed assessment of a student's phonics skills points to areas in which the student is likely to benefit most from systematic, explicit phonics instruction. Also, knowing the skills that the student does possess will help in selecting reading tasks that offer the most effective reinforcement of those skills.

HOW

Instructions for administering each part of the survey are included on the Record Form. Students read from the Student Material on the pages that follow the Record Form. To focus the student's attention on the part of the test being given, cover the other parts with a piece of paper. The Record Form shows the same material that appears on the Student Material, in a reduced size, so that you may easily record the student's responses.

Following administration, score each of the test parts, and transfer the results to the first page of the Record Form under Skills Summary. Retest every 4–6 weeks but only on parts not yet mastered. Be aware of the student's behavior during testing. If the student is tiring or making many consecutive errors, discontinue testing at that time.

WHAT IT MEANS

This test is a mastery test. It is expected that students will ultimately get all items correct.

- In five-item subtest, a student who misses two or more items would benefit from more direct instruction in the indicated element.
- In ten-item subtests, three or more errors warrant attention.

WHAT'S NEXT?

Use the information to monitor phonics instruction and to design skill groups in direct instruction in the particular element measured. Older students who score poorly on the CVC portion of the survey may need further assessment, such as the *CORE Phoneme Segmentation Test*.
