The Palgrave Handbook of Urban Ethnography Italo Pardo, Giuliana B. Prato, 2017-11-14 These ethnographically based studies of diverse urban experiences across the world present cutting edge research and stimulate an empirically grounded theoretical reconceptualization The essays identify ethnography as a powerful tool for making sense of life in our rapidly changing complex cities They stress the point that while there is no need to fetishize fieldwork or to view it as an end in itself its unique value cannot be overstated These active engaged researchers have produced essays that avoid abstractions and generalities while engaging with the analytical complexities of ethnographic evidence Together they prove the great value of knowledge produced by long term fieldwork to mainstream academic debates and more broadly to society

The question of how to properly enforce against RPM has been a contentious debate for decades on both sides of the Atlantic. The catalyst is the acceptance that RPM can generate both anti-competitive effects and pro-competitive efficiencies that need to be properly balanced to ensure against Type I Type II errors and to create viable legislation. Part I focuses on 100 years of US origins and the current legal approach to VR enforcement which reveals the precedent responsible for the transition between per se illegality and the rule of reason thresholds at the federal level. Nine anti-competitive and 19 pro-competitive theoretical models are also introduced to clearly demonstrate the true nonconsensus existent between economists as to whether RPM is deleterious enough to justify a stringent approach to RPM regulation. Part II closely examines the EU origins and current legal structure where RPM has maintained its hardcore by object designation pursuant to Art 101 1 TFEU with the consequence of having no safe harbours, no applicability of the De Minimis Doctrine, an onerous negative rebuttable presumption, non-severability of the agreement and almost no chance of obtaining an exemption under Art 101 3. This is exacerbated by the EC's lack of guidance on how to prove all conditions necessary for an Art 101 3 exemption and when a vertical arrangement actually escapes Art 101 1 applicability. The aim of this book is to examine the economic models, historical origins and legal structures of the US/EU regimes to develop proposals on how to modify the EU's current legal structure to ensure proper enforcement of RPM behaviour that actually enhances legal certainty through a more aligned approach at the national level. Part III proposes five solutions which scrutinise the concepts of appreciability, hardcore and by object restraints to implement modifications to EU's current legal framework to ensure RPM receives reasonable and equitable treatment in line with economic theory.
