Sea and Land Philip D. Morgan, John Robert McNeill, Matthew Mulcahy, Stuart B. Schwartz, 2022 Sea and Land provides an in depth environmental history of the Caribbean to ca 1850 with a coda that takes the story into the modern era It explores the mixing movement and displacement of peoples and the parallel ecological mixing of animals plants microbes from Africa Europe elsewhere in the Americas and as far away as Asia It examines first the arrival of Native American to the region and the environmental transformations that followed It then turns to the even more dramatic changes that accompanied the arrival of Europeans and Africans in the fifteenth century Throughout it argues that the constant arrival dispersal and mingling of new plants and animals gave rise to a creole ecology Particular attention is given to the emergence of Black slavery sugarcane and the plantation system an unholy trinity that thoroughly transformed the region s demographic and physical landscapes and made the Caribbean a vital site in the creation of the modern western world Increased attention to issues concerning natural resources conservation epidemiology and climate have now made the environment and ecology of the Caribbean a central historical concern Sea and Land is an effort to integrate that research in a new general environmental history of the region Intended for scholars and students alike it aims to foster both a fuller appreciation of the extent to which environmental factors shaped historical developments in the Caribbean and the extent to which human actions have transformed the biophysical environment of the region over time The combined work of eminent authors of environment and Latin American and Caribbean history Sea and Land offers a unique approach to a region characterized by Edenic nature and paradisiacal qualities as well as dangers diseases and disasters *Status Report on Law of the Sea Conference* United States. Service,1974 *Current Background* ,1974-12-23 *A Sea Full of Turtles* Bill Streever,2024-07-02 An inspired and impassioned story of adventure that explores the richness of marine life and charts a path of resilience and hope Everyone alive today is witnessing a mass extinction event caused by the more than eight billion humans who share this planet At times it seems there is little hope Climate change resource exploitation agrochemicals overfishing plastics dead zones in our oceans drought and desertification conversion of habitat to housing farming and industrial infrastructure the list of impacts and insults goes on and on We are it seems on an unalterable path that will continue to decimate biodiversity A feeling of hopeless while not unwarranted is part of the problem Without hope without some belief in the possibility of positive outcomes the fight for nature is over Why even try if the battle is already lost While staring the problems squarely in the face *A Sea Full of Turtles* offers hope for those who care about our living world Delivered as a travel narrative set in Mexico s Gulf of California Sea of Cortez at one level the book focuses on dramatically underfunded but highly successful efforts to protect sea turtles But the book goes beyond Mexico and beyond sea turtles to look at how some humans have changed their relationship with nature and how that change can one day end the extinction crisis Enchanting galvanizing and brimming with joy and wonder *A Sea Full of Turtles* will inspire immediate action to face the great challenges that lie ahead Pessimism is the lazy way out Optimism it turns out is both a reasonable and an essential attitude for us all as we fight for the beautiful diversity of life on our Earth **Law of the Sea and Maritime Delimitation** Angel Horna,2022-12-16 The law of maritime delimitation has been shaped by the interpretation of certain provisions of the United Nations Convention on the Law of the Sea which has led to State practice being neglected in current scholarship This book presents an overview of the under examined question of the impact of State practice in Latin America and the Caribbean on the development of the law of maritime delimitation Examining the status of maritime boundaries in Latin America and the Caribbean this book also ponders the impact of State practice and case law on the law of maritime delimitation It outlines the historical framework of the establishment of maritime jurisdiction during colonial times and assesses the evolution of maritime delimitation and the contribution of Latin America and the Caribbean to the modern law of the sea It discusses the law of maritime delimitation and through jurisprudence the development of the three stage methodology to describe and explain maritime delimitation agreements in Latin America and the Caribbean according to the method or methods of delimitation employed It reviews maritime boundaries in Latin America and the Caribbean that were submitted to third party adjudication as well as provisional arrangements considering the role of State practice in Latin America and the Caribbean on the development of the law of maritime delimitation With a renewed focus on maritime delimitation and increasing litigation focused on Latin America and the Caribbean the book will be of interest to students academics and practitioners in the fields of international law law of the sea and State practice *The South China Sea Arbitration* Stefan Talmon,Bing Bing Jia,2014-11-01 On 22 January 2013 the Republic of the Philippines instituted arbitral proceedings against the People s Republic of China PRC

under the United Nations Convention on the Law of the Sea UNCLOS with regard to disputes between the two countries in the South China Sea South China Sea Arbitration On 19 February 2013 the PRC formally expressed its opposition to the institution of proceedings making it clear from the outset that it will not have any part in these arbitral proceedings and that this position will not change It is thus to be expected that over the next year and a half the Tribunal will receive written memorials and hear oral submissions from the Philippines only The Chinese position will go unheard However the Tribunal is under an obligation before making its award to satisfy itself not only that it has jurisdiction over the dispute but also that the claims brought by the Philippines are well founded in fact and law UNCLOS Annex VII Article 9 This book aims to offer a not the Chinese perspective on some of the issues to be decided by the Tribunal and thus to assist the Tribunal in meeting its obligations under the Convention The book does not set out the official position of the Chinese government but is rather to serve as a kind of *amicus curiae* brief advancing possible legal arguments on behalf of the absent respondent The book does not deal with the merits of the disputes between the Philippines and the PRC but focuses on the questions of jurisdiction admissibility and other objections which the tribunal will have to decide as a preliminary matter The book will show that there are insurmountable preliminary objections to the Tribunal deciding the case on the merits and that the Tribunal would be well advised to refer the dispute back to the parties in order for them to reach a negotiated settlement The book brings together scholars of public international law from mainland China Taiwan and Europe united by a common interest in the law of the sea and disputes in the South China Sea This title is included in Bloomsbury Professional's International Arbitration online service

The Oxford Handbook of the Law of the Sea Donald R. Rothwell, Alex G. Oude Elferink, Karen N. Scott, Tim Stephens, 2015-03-26

Human activities have taken place in the world's oceans and seas for most of human history With such a vast number of ways in which the oceans can be used for trade exploited for natural resources and fishing as well as concerns over maritime security the legal systems regulating the rights and responsibilities of nations in their use of the world's oceans have long been a crucial part of international law The United Nations Convention on the Law of the Sea comprehensively defined the parameters of the law of the sea in 1982 and since the Convention was concluded it has seen considerable development This Oxford Handbook provides a comprehensive and original analysis of its current debates and controversies both theoretical and practical Written by over forty expert and interdisciplinary contributors the Handbook sets out how the law of the sea has developed and the challenges it is currently facing The Handbook consists of forty chapters divided into six parts First it explains the origins and evolution of the law of the sea with a particular focus upon the role of key publicists such as Hugo Grotius and John Selden the gradual development of state practice and the creation of the 1982 UN Convention It then reviews the components which comprise the maritime domain assessing their definition assertion and recognition It also analyses the ways in which coastal states or the international community can assert control over areas of the sea and the management and regulation of each of the maritime zones This includes investigating the development of the

mechanisms for maritime boundary delimitation and the decisions of the International Tribunal for the Law of the Sea The Handbook also discusses the actors and intuitions that impact on the law of the sea considering their particular rights and interests in particular those of state actors and the principle law of the sea institutions Then it focuses on operational issues investigating longstanding matters of resource management and the integrated oceans framework This includes a discussion and assessment of the broad and increasingly influential integrated oceans management governance framework that interacts with the traditional law of the sea It considers six distinctive regions that have been pivotal to the development of the law of the sea before finally providing a detailed analysis of the critical contemporary issues facing the law of the sea These include threatened species climate change bioprospecting and piracy The Handbook will be an invaluable and thought provoking resource for scholars students and practitioners of the law of the sea

Cruising World ,1991-05 Energy from the Sea Nigel Bankes,Seline Trevisanut,2015-09-29 One of the main challenges of our time is to be able to guarantee energy supply at a reasonable price Policy makers international institutions and the private sector increasingly look to the oceans as a significant source of energy The Law of the Sea provides the legal framework within which any maritime activity is performed and strikes a balance between the multiple activities that can take place simultaneously in the same maritime zone This volume addresses some of the main legal challenges raised by the expansion of the ocean energy sector and its consequences for the relevant international normative and institutional framework Some of the major themes explored include energy sources and the competition for marine space energy security private actors and corporate social responsibility fragmentation or integration evolution and reinforcement of international law and liability

Historic Waters and Historic Rights in the Law of the Sea Clive R. Symmons,2019-03-27 The issue of historic rights and historic waters has long been a problematic area in the law of the sea where even basic definitions have been vague and interchangeably used in the past The first edition of this book was entitled Historic Waters in the Law of the Sea A Modern Re Appraisal and concentrated as the title implies on the doctrine of historic waters The title of this expanded new edition has been broadened to take account of the important clarifications as to the doctrine of historic maritime claims generally particularly historic rights in the narrow sense which fall short of sovereignty claims These latter rights such as they now are are discussed in depth in the new text This development has come about of course because of the Award of the Arbitral Tribunal in Philippines v China in 2016 This decision has for the first time in a judicial setting rationalised the terminology in this area of the law of the sea and most importantly has clarified the close interaction of historic rights with the Law of the Sea Convention This new edition discusses the latter issue passim showing that much of the former customary law doctrine has now been overridden by the Convention

International Law provides a concise and accessible exposition of the key areas of international law for the student This edition has been updated to include new material on the use of force the International Criminal Court and terrorism Sea of Storms Stuart B. Schwartz, 2016-07-26 A panoramic social history of hurricanes in the Caribbean The diverse cultures of the Caribbean have been shaped as much by hurricanes as they have by diplomacy commerce or the legacy of colonial rule In this panoramic work of social history Stuart Schwartz examines how Caribbean societies have responded to the dangers of hurricanes and how these destructive storms have influenced the region s history from the rise of plantations to slavery and its abolition to migrations racial conflict and war Taking readers from the voyages of Columbus to the devastation of Hurricane Katrina Schwartz looks at the ethical political and economic challenges that hurricanes posed to the Caribbean s indigenous populations and the different European peoples who ventured to the New World to exploit its riches He describes how the United States provided the model for responding to environmental threats when it emerged as a major power and began to exert its influence over the Caribbean in the nineteenth century and how the region s governments came to assume greater responsibilities for prevention and relief efforts that by the end of the twentieth century were being questioned by free market neoliberals Schwartz sheds light on catastrophes like Katrina by framing them within a long and contentious history of human interaction with the natural world Spanning more than five centuries and drawing on extensive archival research in Europe and the Americas Sea of Storms emphasizes the continuing role of race social inequality and economic ideology in the shaping of our responses to natural disaster
