AIDS in the World II Global AIDS Policy Coalition, 1996 *AIDS in the World Vol 1* published in 1992 was the first full analysis of mankind's global confrontation with this disease. The AIDS scene, however, has been changing so rapidly that the need for a second volume was felt much earlier than expected. In *AIDS in the World II* the authors extend the international comparisons from 38 countries to the entire world and show that the AIDS pandemic has become increasingly fragmented within the world population. They present data that takes the discussion beyond the current understanding of the vulnerability of nations and communities to the worldwide spread of HIV, engaging in a detailed exploration of the social strategies that have enabled individuals to avoid infection. Mann and Tarantola chart a course into the future based on an incisive investigation of the global pandemic and response, the crucial lessons learned from the first decade and their expert understanding of the scientific and social dimensions of the HIV

challenge The authors explain how the variety of reactions to the pandemic has contributed to a more advanced awareness of our vulnerability to HIV AIDS and offer a blueprint for an expanded global prevention effort Intended to serve the information needs of all professionals involved in AIDS research and care this volume s accessibility and clarity of writing make it highly suitable for the general reader as well
