Laying the Foundation John W. White, Heather Gilbert, 2016-03-15

Laying the Foundation Digital Humanities in Academic Libraries examines the library's role in the development implementation and instruction of successful digital humanities projects It pays special attention to the critical role of librarians in building sustainable programs It also examines how libraries can support the use of digital scholarship tools and techniques in undergraduate education Academic libraries are nexuses of research and technology as such they provide fertile ground for cultivating and curating digital scholarship However adding digital humanities to library service models requires a clear understanding of the resources and skills required Integrating digital scholarship into existing models calls for a reimagining of the roles of libraries and librarians In many cases these reimagined roles call for expanded responsibilities often in the areas of collaborative instruction and digital asset management and in turn these expanded responsibilities can strain already stretched resources Laying the Foundation provides practical solutions to the challenges of successfully incorporating digital humanities programs into existing library services Collectively its authors argue that librarians are critical resources for teaching digital humanities to undergraduate students and that libraries are essential for publishing preserving and making accessible digital scholarship

Untold Narratives Shawn Anthony Robinson, 2018-02-01

This edited book reflects a much needed area of scholarship as the voices of African American AA or Black students defined by various labels such as learning disability blindness visual impairment cognitive development speech or language impairment and hearing impairment are rare within the scholarly literature Students tagged with those identifiers within the Pk 20 academic system have not only been ignored and discounted but have also had their learning framed from a deficit perspective rather than a strength based perspective Moreover it was uncommon to hear first person narratives about how AA students have understood their positions within the general education and special education

systems Therefore with a pervasive lack of knowledge when it comes to understanding the experiences of AA with disabilities this book describes personal experiences and challenges the idea that AA students with disabilities are substandard While this book will emphasize successful narratives it will also provide counter narratives to demystify the myth that those with disabilities cannot succeed or obtain terminal degrees Overall this edited book is a much needed contribution to the scholarly literature and may help teachers across a wide array of academic disciplines in meeting the academic and social needs of AA students with disabilities

ENDORSEMENTS Dr Shawn Robinson s collection of personal narratives raises critical questions about the U S public education system Written by African Americans compartmentalized in special education programs because of actual or perceived disabilities these stories will impel readers even tangentially affiliated with educational institutions to consider testing placement mainstreaming retention and promotion and other assessment policies that determine grade level readiness Thanks to Robinson the perspectives of these graduates who surmounted barriers to more positive and accommodating learning environments now receive proper attention John Pruitt University of Wisconsin Rock County With a bold vision Dr Shawn Anthony Robinson enters the discussion of Special Education with a collection of narratives that highlight the struggles and triumphs of marginalized students In America we have a long contested history of inclusion of students of color and difference in our public mainstream institutions When these students are invited to the education table they still must overcome persistent and pernicious barriers to true and equal educational opportunities Consequently students are left to sink or swim in oceans disparity and inequity This collection of narratives and counter narratives confront the absence of adequate research and other empirical evidence of pedagogy and practice that would be essential to 21st Century progress in educational praxis This volume represents one important step towards adding new voices to the continuing struggle of meaningful inclusion How might students of color and difference succeed in an education system that provides no room to bloom The authors address this challenge by exploring topics such as Aspirational Capital Linguistic Capital Familial Capital Social Capital Navigational Capital and Resistance Capital The reader will be exposed to ideas that will help students make a way out of no way by working both within and against educational systems full of barriers and opportunities Congratulations to Dr Robinson and his colleagues as the content of this volume represents an important contribution to the extant literature Gregory A Diggs Denver Colorado

House of Lords - House of Commons - Joint Committee on the Draft Deregulation Bill: Deregulation Bill - HL 101 - HC 925 Great Britain: Parliament: Joint Committee on the Draft Deregulation Bill,2013-12-19 Having looked at the Draft Deregulation Bill in some detail and taken evidence from a wide range of witnesses the Committee does not think it is appropriate for Ministers to be given power to scrap legislation by order on the subjective test that it is no longer of practical use There is a risk that to give Ministers that power would undermine effective Parliamentary scrutiny It was also felt unnecessary when the Law Commissions currently have the power to put forward outdated Bills for abolition anyway The Law Commissions will need to make changes to their working practices in order to produce more frequent and more responsive Statute Law Repeals Bills The Government should work with the Law Commissions to streamline the process for bringing forward these Bills As for the duty on regulators to have regard to economic growth whilst this is supported in principle it is important that it is not used by Government to undermine the independence of regulators in the way it is implemented It might be helpful if that provision were explicitly included in the Bill
