Graduate Programs in the Biological/Biomedical Sciences & Health-Related Medical Professions 2014 (Grad 3) Peterson's,2013-12-20 Peterson s Graduate Programs in the Biological Biomedical Sciences Health Related Medical Professions 2014 contains comprehensive profiles of nearly 6 800 graduate programs in disciplines such as allied health biological biomedical sciences biophysics cell molecular structural biology microbiological sciences neuroscience neurobiology nursing pharmacy pharmaceutical sciences physiology public health and more Up to date data collected through Peterson s Annual Survey of Graduate and Professional Institutions provides valuable information on degree offerings professional accreditation jointly offered degrees part time and evening weekend programs postbaccalaureate distance degrees faculty students requirements expenses financial support faculty research and unit head and application contact information There are helpful links to in depth descriptions about a specific graduate program or department faculty members and their research and more There are also valuable articles on financial assistance the graduate admissions process advice for international and minority students and facts about accreditation with a current list of accrediting agencies Smart Mobile Communication & Artificial Intelligence Michael E. Auer,Thrasyvoulos Tsiatsos,2024-03-19 Interactive mobile technologies are today the core of many if not all fields of society Not only the younger generation of students expects a mobile working and learning environment And nearly daily new ideas technologies and solutions boost this trend To discuss and assess the trends in the interactive mobile field are the aims connected with the 15th International Conference on Interactive Mobile Communication Technologies and Learning IMCL2023 which was held 9 10 November 2023 Since its beginning in 2006 this conference is devoted to new approaches in interactive mobile technologies with a focus on learning Nowadays the IMCL conferences are a forum of the exchange of new research results and relevant trends as well as the exchange of experiences and examples of good practice Interested readership includes policy makers academics educators researchers in pedagogy and learning theory schoolteachers learning Industry further education lecturers etc **The Cultural Defense of Nations** Liav Orgad,2015-11-05 The Cultural Defense of Nations presents a timely thought provoking thesis on some of the most pressing issues of our time global immigration majority groups and national identity Never in human history has so much attention been paid to human movement Global migration yields demographic shifts of historical significance profoundly shaking up world politics as has been seen in the refugee crisis the Brexit referendum and the 2016 U S election The Cultural Defense of Nations addresses one of the greatest challenges facing liberalism today is a liberal state justified in restricting immigration and access to citizenship in order to protect its majority culture Liberal theorists and human rights advocates recognize the rights of minorities to maintain their unique cultural identity but assume that majorities have neither a need for similar rights nor a moral ground for defending them The majority culture so the argument goes can take care of itself However with more than 250 million immigrants worldwide majority

groups increasingly seek to protect what they consider to be their national identity In recent years liberal democracies have introduced proactive immigration and citizenship policies that are designed to defend the majority culture This book shifts the focus from the prevailing discussion of cultural minority rights and for the first time addresses the cultural rights of majorities It proposes a new approach by which liberal democracies can welcome immigrants without fundamentally changing their cultural heritage forsaking their liberal traditions or slipping into extreme nationalism Disregarding the topic of cultural majority rights is not only theoretically wrong but also politically unwise With forms of majority nationalism rising and the growing popularity of extreme right wing parties in the West time has come to liberally address the new challenge

On Canvas Stephen Hackney, 2020-02-11 The first truly comprehensive analysis of the history practice and conservation of painting on canvas Throughout its long history in Western art canvas has played an influential role in the creative process From the Renaissance development of oil painting on canvas to the present day through Impressionism Abstract Expressionism and other art historical movements the use of canvas has enhanced the scale of painting freedom of brushwork and spontaneity in technique This book recounts some of that rich history in relation to corresponding developments in conservation practice Rather than concentrating on the familiar concerns of cleaning and varnish removal this volume considers the preservation of a painting's structure By focusing on recent studies on the fundamental nature of canvas and its mechanisms of deterioration the book explains new approaches to the conservation of both contemporary and historical art including reversible passive and preventive treatments particularly with respect to lining Written by Stephen Hackney a conservation practitioner and leader in conservation research *On Canvas* is the first book to take a comprehensive look at this important subject and is destined to become an invaluable resource for the field **"The" Athenaeum**, 1888

Defending Materialism Katerina Kolozova, William Paul Cockshott, Greg Michaelson, 2024-11-14 Nobody doubted that atoms were real once atomic energy was developed but in the early 20th century and before their existence was widely doubted Defending Materialism follows the political and theoretical background of this intense philosophical controversy defending atomistic and mechanical materialism against idealist paradigms These accounts range from the explicit idealism criticised by Lenin and Einstein to the implicit Hegelian idealism that influenced Soviet dialectical materialism Following several key threads the authors trace how the idea of atoms has changed over the centuries how ideology has influenced both sides of the idealism materialism divide and how the nature of time in physics biology and human society can give a fresh view of historical materialism Starting from the origins of materialism in ancient Greek thought and moving through its revival in Isaac Newton and Charles Darwin gives a full picture of the links between the Marxist tradition and the coarse materiality to which the worlds of science and philosophy have found themselves both subscribed and averse **At the Crossroads: Lessons and Challenges in Computational Social Science** Javier Borge-Holthoefer, Yamil Moreno, Taha Yasseri, 2016-11-29 The interest of physicists in economic and social questions is not new for over four decades we have

witnessed the emergence of what is called nowadays sociophysics and econophysics vigorous and challenging areas within the wider Interdisciplinary Physics With tools borrowed from Statistical Physics and Complexity this new area of study have already made important contributions which in turn have fostered the development of novel theoretical foundations in Social Science and Economics via mathematical approaches agent based modelling and numerical simulations From these foundations Computational Social Science has grown to incorporate as well the empirical component aided by the recent data deluge from the Web 2.0 and 3.0 closing in this way the experiment theory cycle in the best tradition of Physics

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a

broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

Transfer Pricing and Value Creation Raffaele Petruzzi,Romero J.S. Tavares Esq.,2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law The notion of Value Creation reframes the interpretation and application of the Arm s Length Principle ALP that is embedded in Articles 7 and 9 of the OECD Model Convention This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy Our LL M students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research
