Physical Science Grade 12September 2014:

Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08 The 2010 astronomy and astrophysics decadal survey New Worlds New Horizons in Astronomy and Astrophysics laid out an exciting portfolio of recommended activities to guide the agencies research programs over the period 2012-2021. The newly constituted Committee on Astronomy and Astrophysics CAA is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington D C on March 28-30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting the CAA received a question from NASA about an upcoming Small Explorer SMEX mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX sized mission to justify a SMEX Announcement of Opportunity AO in 2018 or 2019 as is currently planned. *Spin Dynamics in Two-Dimensional Quantum Materials* Marc Vila Tusell, 2021-11-10 This thesis focuses on the exploration of nontrivial spin dynamics in graphene based devices and topological materials using realistic theoretical models and state of the art quantum transport methodologies. The main outcomes of this work are: i) the analysis of the crossover from diffusive to ballistic spin transport regimes in ultraclean graphene nonlocal devices and ii) investigation of spin transport and spin dynamics phenomena such as the quantum spin Hall effect in novel topological materials such as monolayer Weyl semimetals WTe_2 and MoTe_2 . Indeed the ballistic spin transport results are key for further interpretation of ultraclean spintronic devices and will enable extracting precise values of spin diffusion lengths in diffusive transport and guide experiments in the quasi-ballistic regime. Furthermore the thesis provides an in-depth theoretical interpretation of puzzling huge measured efficiencies of the spin Hall effect in MoTe_2 as well as a prediction of a novel canted quantum spin Hall effect in WTe_2 with spins pointing in the yz plane.
