Physical Science Paper 2 Mid Year Limpopo 2014:

Geology of North Africa and the Mediterranean: Sedimentary Basins and Georesources Sami Khomsi, Francois Roure, 2023-03-18 This book summarizes the links between the evolution of sedimentary basins of Northern Africa and the Mediterranean in different tectonic settings and the distribution of georesources in those basins. Georesources include fossil energy, geothermal energy, deep aquifers, minerals, and deposits. This book also provides key information for energy resources in these important areas. The book is in part a compilation of selected papers from the Atlas Georesources International Congress Hammamet Tunisia AGIC 2017, which were extended after the congress, in addition to other contributions from geoscientists based at some universities and companies from the region. It is organized in a set of research studies focusing on the architecture, geodynamic evolution, and modeling of sedimentary basins in the Middle East, North Africa, and the Mediterranean domain. Future developments in the exploration for water energy and other georesources are very important in these regions. In this context, this book constitutes an important reference for a wide range of geoscientists and companies as it defines the distribution and potentialities of these resources.
