QUESTION	ANSWER
How does the cell die?	Apoptosis • controlled cell death process • no inflammation, does not require immune system to remove dead cells • programmed cell death that can be initiated by internal factors (chemical, mechanical, electrical stress) or by external factors (growth factors, drugs, injury, viral infection, etc.) • active involvement of the cell's organelles
How does external injury initiate apoptosis?	Apoptosis • controlled cell death process • active involvement of the cell's organelles • can be initiated by internal factors (chemical, mechanical, electrical stress) or by external factors (growth factors, drugs, injury, viral infection, etc.)
How does mechanical stress initiate apoptosis?	Apoptosis • active involvement of the cell's organelles • can be initiated by internal factors (chemical, mechanical, electrical stress) or by external factors (growth factors, drugs, injury, viral infection, etc.)
How does chemical stress initiate apoptosis?	Apoptosis • active involvement of the cell's organelles • can be initiated by internal factors (chemical, mechanical, electrical stress) or by external factors (growth factors, drugs, injury, viral infection, etc.)
How does electrical stress initiate apoptosis?	Apoptosis • active involvement of the cell's organelles • can be initiated by internal factors (chemical, mechanical, electrical stress) or by external factors (growth factors, drugs, injury, viral infection, etc.)
