Daily Graphic Ransford Tetteh, 2014-09-10 Prosecuting International Crimes: A Multidisciplinary Approach Bartłomiej Krzan, 2016-07-11 The volume edited by Bartłomiej Krzan offers different perspectives on the prosecution of international crimes. The analyses contained therein reflect different backgrounds, mainly legal, combining several disciplines and making it a multidisciplinary study. The main but definitely not the exclusive point of reference is that of international law. In addition, other perspectives, those of legal history or sociology of law, and obviously the one of criminal law, both substantive and procedural, provide useful alternatives or, in most occasions, complementary approaches to the examination of the prosecution of international crimes. The book combines different views, backgrounds, and underlying assumptions. But gathered together, they are hoped to shed some additional useful light that might be helpful for identifying new dimensions of the reaction, judicial or other, towards international crimes. Contributors: Władysław Czapliński, Patrycja Grzebyk, Witold Jakimko, Wojciech Jasiński, David Kohout, Karolina Kremens, Bartłomiej Krzan, Krzysztof Maso, Neringa Mickevičiūtė, Robert Uerpmann, Wittzack Regina, Valutytė Karolina, Wierczyńska, Joachim Wolf, Loammi Wolf, and Justinas ilinskas *Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data-based Methods* Faming Huang, Jinsong Huang, Wei Chen, Jinquan Liu, 2022-10-07 **Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions** Francesco Silvestri, Nicola Moraci, 2019-10-22 Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions contains invited keynote and theme lectures and regular papers presented at the 7th International Conference on Earthquake Geotechnical Engineering, Rome, Italy, 17-20 June 2019. The book is divided into the sections below: Invited papers, Keynote papers, Theme lectures, Special Session on Large Scale Testing, Special Session on Liquefaction Projects, Special Session on Lessons learned from recent earthquakes, Special Session on the Central Italy earthquake. Regular papers. Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions provides a significant up-to-date collection of recent experiences and developments and aims at engineers, geologists, and seismologists, consultants, public and private contractors, local, national, and international authorities, and to all those involved in research and practice related to Earthquake Geotechnical Engineering **Policing and Boundaries in a Violent Society** Guy Lamb, 2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service (SAPS). By means of a historical analysis of South Africa, this book introduces a new concept, police frontierism, which illuminates the nature of the relationships between the police, policing, and boundaries and can potentially be used for future case study research. Drawing on a wealth of research, this book examines how social and

territorial boundaries strongly influenced police practices and behaviour in South Africa and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary Focusing on cases of high density police operations public order policing and the recent policing of the COVID 19 lockdown this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa This book will be of interest to scholars and students interested in policing in post colonial societies characterised by high levels of violence as well as police work and police militarization
