Overcoming Barriers to Deployment of Plug-in Electric Vehicles National Research Council, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Overcoming Barriers to Electric-Vehicle Deployment, 2015-06-26 In the past few years interest in plug in electric vehicles PEVs has grown Advances in battery and other technologies new federal standards for carbon dioxide emissions and fuel economy state zero emission vehicle requirements and the current administration s goal of

putting millions of alternative fuel vehicles on the road have all highlighted PEVs as a transportation alternative. Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles such as lower operating costs, smoother operation and better acceleration, the ability to fuel up at home and zero tailpipe emissions when the vehicle operates solely on its battery. There are, however, barriers to PEV deployment including the vehicle cost, the short all-electric driving range, the long battery charging time, uncertainties about battery life, the few choices of vehicle models and the need for a charging infrastructure to support PEVs. What should industry do to improve the performance of PEVs and make them more attractive to consumers? At the request of Congress, *Overcoming Barriers to Deployment of Plug-in Electric Vehicles* identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers. This report examines the characteristics and capabilities of electric vehicle technologies such as cost, performance, range, safety and durability and assesses how these factors might create barriers to widespread deployment. *Overcoming Barriers to Deployment of Plug-in Electric Vehicles* provides an overview of the current status of PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers. Through consideration of consumer behaviors, tax incentives, business models, incentive programs and infrastructure needs, this book studies the state of the industry and makes recommendations to further its development and acceptance.

Paths to Clean Water Under Rapid Changing Environment in China Yiping Li, Lixiao Ni, Yong Guo, Xu Zhao, Yue Dong, Yu Cheng, 2022-07-30. This book mainly provides the current status of water pollution faced by China under rapid changing environment and the actions that have been taken for prevention and treatment of water pollution. It points out that the water pollution situation is severe. Facing water pollution, China's experiences include several aspects on source control and pollution interception, internal nutrient removal, sediment ecological restoration and water transfer policy. There exists both the opportunity and challenge for the prevention and control of water pollution in China. The book contains numerous charts and diagrams which further illustrate China's paths to clean water.

Biodiversity and Business Laladhas Krishna Panicker, Prakash Nelliya, Oommen V. Oommen, 2024-12-04. This book addresses the climate risk influencing biodiversity globally and discusses the sustainable use of biological diversity and its legal implications. The sustainable bio-prospecting will help conservation regarding the resources and livelihood support of those who conserve it from the UN CBD perspective. In mega-bio-diverse countries, biodiversity provides a number of ecosystem services as well as sources of income and livelihood for millions of poor and they are also the home of a vast repository of traditional knowledge (TK) associated with biological resources which can be translated therapeutically. As for climate risks, the risks related to unscientific management and use of biodiversity are far more compared to the benefits for society and business and therefore reducing pressure on biodiversity and developing a

sustainable commodity supply chain is essential for both the industry and the governments Exploring and further mining of the vastness of biodiversity potential in the marketplace has been a subject of great consideration among biotechnologists food processors health care specialists and the like as they are real money spinners The book will be of interest to researchers College University students interested in ecology and biodiversity conservation worldwide *Textbook of Pediatric Rheumatology* Ross E.
