Diversity in Unity: Perspectives from Psychology and Behavioral Sciences Amarina Ashar Ariyanto,Hamdi Muluk,Peter Newcombe,Fred P Piercy,Elizabeth Kristi Poerwandari,Sri Hartati R. Suradijono,2017-10-31 The book highlights both the challenges and opportunities in the field of psychology and behavioral sciences with an emphasis on identifying practical implications for professionals educators and administrators and researchers in Asia and Pacific regions Societies in the said regions have experienced massive changes to their social system changes that are endured by societies worldwide such as those related to globalization new technologies and new norms regarding respect for individual diversity and well being Although the changes offer a wealth of new opportunities they also act as potential sources of tension and apprehension The book discusses the state of the art topics on critical issues in various sub fields of psychology and the behavioral sciences such as Clinical Psychology Child Developmental Psychology Industrial Organizational Psychology Experimental Psychology Social Psychology and Educational Psychology This is an Open Access ebook and can be found on www.taylorfrancis.com Neuroinflammation and Behaviour Luba Sominsky,Adam K. Walker,Deborah M.

Hodgson,2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing

physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives
