

Multi-Function Display (MFD)

Applicable Models:

- 70L
- PPD 1200

The Power Multi-Function Display (MFD) allows the operator to see such important information as time run, oil level, fuel, maximum speed, current speed, fuel level and more at the touch of a button. Following is a summary of operating instructions for both types of MFDs. A description of Operating Modes and Key Functions is found below followed by Troubleshooting the MFD system.

OPERATION AND MODES

NOTE: Not all MFDs have all these functions.

HOUR: Secondary display function controls multi-LCD when selected by mode key. HOUR annunciator is on when in TACH mode. Actual engine run hours are displayed in 1 hour increments from 0 to 999.9 hours. HOUR annunciator neither reads nor sets when power is removed due to non-volatile EEPROM memory.

CLOCK: CLOCK is a secondary display function and controls multi-LCD when selected by mode key. CLOCK annunciator is on when in CLOCK mode. To set the time, first enter CLOCK mode and then hold the SET key for 2-4 seconds to enter CLOCK SET mode. Both keys are now used to adjust the time. MODE selects the digit, SET advances the digit. Press MODE when complete to start the clock (colon) begins to flash.

PEAK SPEED/RPM: While in TACH mode, pressing the SET key will display both the peak speed and maximum sustained RPM since the last reset or auto-off occurred. While displayed, holding the SET key for 4 seconds will reset the peak memories.

KEY FUNCTIONS AND DISPLAY

MODE KEY: Toggles multi-LCD display modes as pressed. Annunciators scroll from left to right to indicate selection.

SET KEY: Function varies with selected mode. Used to temporarily disable warning indications, to access peak speed and RPM while in TACH mode, reset distance in DIST mode, select MPH/KMPH while in VOLT mode, and to set time while in CLOCK mode.

LCD DISPLAY: Displays variety of both essential and performance data: speed, RPM, fuel level, oil level, trim position, distance, voltage, engine hours, clock, peak speed, peak RPM, and warning conditions (low fuel, low oil, low power, high temperature).

WARNING LED: Super bright LED flashes to alert rider of warning condition. Actual condition is then displayed in multi-LCD readout.

SPEED: Primary display function, controls left LCD at all times. Displays speed with .1 MPH resolution from 0-75 MPH. Input is received from pit intake fan.

TACH: Yellow wire from alternator. Default secondary display function, controls Multi-LCD at power on or when selected by MODE key. RPM annunciator is on when in TACH mode. Displays RPM with 10 RPM resolution.
