Shaw,Paul Sinclair,2014-05-22 Africa has a vibrant past It emerges from this book as the proud possessor of a vast and highly complicated interweaving of peoples and cultures practising an enormous diversity of economic and social strategies in an extraordinary range of environmental situations At long last the archaeology of Africa has revealed enough of Africa s unwritten past to confound preconceptions about this continent and to upset the picture inferred from historic written records Without an understanding of its past complexities it is impossible to grasp Africa s present let alone its future

Researches in African poetries have approached it on many perspectives but on the other side the stylistics of these art forms have raised less interest Metre is an example of this In the Swahili and Wolof poetic traditions the existence of metrical patterns is a datum reported by scholars with very little further elaboration In particular these metrical patterns have often been seen as a mere adaptation of the Arabic ones This book aims at challenging this view offering a historical reconstruction of the development of the Swahili and Wolof metrical systems Particular attention is given to the role of the Arabic model this work shows that the Swahili and Wolof poetries presented an elaborated stylistics even before the Arabic model affected them In the case of Swahili one can even speak of preexisting metrical traditions The influence from Arabic has certainly deeply changed the local Swahili and Wolof stylistics of poetry but many elements of continuity exist between the two periods before and after it In these two contexts then stylistics has always been a fundamental trait of poetry and a more attentive look at its history can reveal much of the overall development of the poetic tradition in general      *Africa from the Sixteenth to the Eighteenth Century* Unesco. International Scientific Committee for the Drafting of a General History of Africa,1999

*Society, Power, and Land in Northeastern Zimbabwe, ca. 1560–1960* Admire Mseba, 2024-11-12

A little over two decades ago, Zimbabwe undertook its Fast Track Land Reform Programme. Critics saw it as nothing more than an assault on human and property rights for political expedience by a ruling elite that was fast losing its power. In contrast, those sympathetic to the land reform program saw it as fundamental to the righting of colonialism's historical wrongs. Yet rural displacements at the hands of state actors or of those closely connected to them continue. As in the past, the continuing land conflicts are mostly understood as the result of the actions of an authoritarian state that exploits its control of land for the political and economic benefit of those who inhabit it. These explanations share one thing in common: each understands the country's perpetual land questions in terms of the actions or inactions of the colonial or the postcolonial state. This book refocuses attention on how regimes of power, rooted in kinship, gender, generation, and status, have individually and in combination informed access to land in precolonial northeastern Zimbabwe. It then examines how these regimes of power interacted with colonial policies to inform the African experience in colonial Zimbabwe. Further, the book places land and the ability to ensure its fecundity at the center of the making and moderation of precolonial political power and how this power was impacted by the imposition of colonial rule. Tracing the dynamics of land and power from precolonial times together with their entanglement with colonial policies is important for this relationship is almost always neglected by both scholars and policymakers drawn to the high drama of colonial and postcolonial politics of land. This oversight has real consequences on our understandings of landed inequalities and how they are addressed. When Zimbabwe's postcolonial state focused on colonially induced racialized land inequalities, its land reform efforts left older forms of landed inequalities based on gender, generation, and ideas of belonging intact. The book, which details these inequalities, reminds Zimbabweans and others that if the quest for equity espoused in postcolonial land reforms is to be meaningful, it must be attentive to both colonially induced inequalities and those enduring disparities that predated, were deepened by, and outlived colonial rule. At the same time, Zimbabweans who now live with a postcolonial state that is increasingly centralizing power over land may well learn from past societies' creative efforts to limit the authority of their leaders.

**Aspects of Central African History** T. O. Ranger, 1968

*Africa from the Sixteenth to the Eighteenth Century* Bethwell A. Ogot, 1992

The result of years of work by scholars from all over the world, The UNESCO General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with

other continents demonstrate Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. This fifth volume of the acclaimed series covers the history of the continent from the beginning of the sixteenth century to the close of the eighteenth century in which two themes emerge: first, the continuing internal evolution of the states and cultures of Africa during this period; second, the increasing involvement of Africa in external trade with major but unforeseen consequences for the whole world. In North Africa we see the Ottomans conquer Egypt. South of the Sahara, some of the larger older states collapse and new power bases emerge. Traditional religions continue to coexist with both Christianity suffering setbacks and Islam in the ascendancy. Along the coast, particularly of West Africa, Europeans establish a trading network which, with the development of New World plantation agriculture, becomes the focus of the international slave trade. The immediate consequences of this trade for Africa are explored, and it is argued that the long-term global consequences include the foundation of the present world economy with all its built-in inequalities.

**Great Zimbabwe** Joseph O. Vogel, 2019-08-22. First Published in 1994. This research guide was written as a comprehensive though by no means exhaustive survey of the literature pertinent to studying the indigenous complex societies of south central Africa. Although the paramount focus of the compilation was the archaeology of Great Zimbabwe, the author has drawn from a broad geographical area and a wider period of time than that usually associated with Zimbabwean culture in order to demonstrate the cultural background for the growth of monumental trading towns in south central Africa.

*Cities in the World: 1500-2000: v. 3* Adrian Green, 2018-12-13. Papers presented at the Cities in the World conference held at Southampton University and organised through the Society for Post Medieval Archaeology challenged the commonly held perception that cities are about the present and the future, not about the past. All cities have an innate sense of the past, and this volume encompasses as it does.
