Thermoforming Geza Gruenwald, 2018-05-04. FROM THE FOREWORD: Dr Gruenwald has indicated the desirable properties of polymeric materials for differing applications; thus his text is especially useful for polymer chemists who must tailor plastic materials for specific groups of applications. Engineers in extruding and calendering film and sheet will benefit from the intimate relationships elucidated between processing parameters imposed upon stocks employed in thermoforming and the products thereof. Mold designers are provided with a complete guide that will enable them to avoid the less obvious pitfalls and wasted effort so often experienced in the evolution of molds for especially complex parts. Quite likely Dr Gruenwald's suggestions will lead to considerable benefits to those who read and practice by this remarkable exposition of thermoforming technology.
