

Research Population vs Sample

Population

Represents the entire group of individuals or elements of interest to the researcher.

The measurable characteristic of the population, like the mean or standard deviation, is known as the parameter.

Parameters and characteristics of the population are the focus of the study.

Difficult to access and gather data from the entire population due to logistical and resource constraints.

Sample

Subset of the population selected for data collection and analysis.

The measurable characteristic of the sample is called a statistic.

Data collected from the sample is used to make inferences about the population.

More feasible and practical to collect data from a sample within the available resources and time frame.

Research and Evaluation for Business Marilyn K. Pelosi, Theresa M. Sandifer, Uma Sekaran, 2001 Research and Evaluation for Business is intended for use in either a one or two semester introductory business statistics course The focus of the text is on decision making based on data analysis This is a real data and problem oriented text that teaches the actual practice of statistical thinking management of decision making for tool selection assumptions management outcome interpretation and reporting The text incorporates where appropriate Excel and Minitab commands and output in examples and exercises Publisher s website Statistics for Modern Business Decisions Lawrence L. Lapin, 1990 Understanding Political Science Research Methods Maryann Barakso, Daniel M. Sabet, Brian Schaffner, 2013-12-04 This text starts by explaining the fundamental goal of good political science research the ability to answer interesting and important questions by generating valid inferences about political phenomena Before the text even discusses the process of developing a research question the authors introduce the reader to what it means to make an inference and the different challenges that social scientists face when confronting this task Only with this ultimate goal in mind will students be able to ask appropriate questions conduct fruitful literature reviews select and execute the proper research design and critically evaluate the work of others The authors primary goal is to teach students to critically evaluate their own research designs and others and analyze the extent to which they overcome the classic challenges to making inference internal and external validity concerns omitted variable bias endogeneity measurement sampling and case selection errors and poor research questions or theory As such students will not only be better able to conduct political science research but they will also be more savvy consumers of the constant

flow of causal assertions that they confront in scholarship in the media and in conversations with others Three themes run through Barakso Sabet and Schaffner s text minimizing classic research problems to making valid inferences effective presentation of research results and the nonlinear nature of the research process Throughout their academic years and later in their professional careers students will need to effectively convey various bits of information Presentation skills gleaned from this text will benefit students for a lifetime whether they continue in academia or in a professional career Several distinctive features make this book noteworthy A common set of examples threaded throughout the text give students a common ground across chapters and expose them to a broad range of subfields in the discipline Box features throughout the book illustrate the nonlinear non textbook reality of research demonstrate the often false inferences and poor social science in the way the popular press covers politics and encourage students to think about ethical issues at various stages of the research process
