What Is Cool?

TITLE

INTRO

The party is one of the most well-known social events across all cultures. Once reserved for celebrating birthdays, holidays, and other specific occasions, the modern party has grown beyond those limits, often sprouting up without singular intent or reason. Parties are a hub for social interaction among youths and have naturally been a space of uncertainty as attendees attempt to both "have fun" and "be cool." While the instructional video *Show Off! How To Be Cool At Parties* engages with some decidedly uncool ideas, it presents the idea of "coolness" as attainable, and grounds the archetype of the "Cool Person at the Party" within historical contexts.

SUMMARY

Show Off! How To Be Cool At Parties (Stunts, Tricks and Gags to Amaze Your Friends) is an instructional video released on VHS in 1986. Nearly a half-hour long, the video stars Malcolm-Jamal Warner, best known for his role on *The Cosby Show*, and a cast of relatively unknown actors and comedians as they attempt to instruct the viewer on the fine art of being cool around other people. Despite the central thesis of the video, much of its material is uncool, impractical, or downright strange. For example, there is some suspension of disbelief that even young children of the 1980s would find coolness in pretending to be attacked by a dog or playing the air piano.

Through a modern lens, *Show Off!* possesses a toothlessness, but this may be a direct response to the events of its time. According to Haynes Johnson of the *Washington Post*, 1986 was "A Year of National Shocks," a time when "events seemed out of control." In the waning years of the Cold War, 1986 was underlined by two major disasters: the failed launch of the Space Shuttle *Challenger* in January and the nuclear explosion at Chernobyl in April. These events sowed doubt about global technologies and fear in the systems and infrastructure designed to care for us. Retreating to the mundanities of nose whistling and "catching" an invisible ball in a paper bag were as much about staying grounded as they were maintaining a sense of control.

CONCLUSION

In conclusion, *Show Off! How To Be Cool At Parties* is an instructional video that acts as a direct response to politics and trauma of the time through the social archetype of the cool person at a party. Although it presents a hazy idea of what "coolness" could look like, the video begs the opposite question: How does one become uncool at parties? Warner's introduction to the video includes the rule of having fun, not for one's own sake, but to ensure that one's friends are having fun. Perhaps the true turning point of "cool" is thinking outward.

Sample Critical Paper:

Critical Appraisal from Papers to Patient Duncan Bootland, Evan Coughlan, Robert Galloway, Emily McWhirter, 2016-12-19 Having an understanding of critical appraisal and evidence based medicine is a prerequisite to being an effective clinician. However, critical appraisal is often taught by people not involved in day to day clinical care meaning the clinical relevance is not always brought to the fore. This book takes a different approach. It is written by clinicians for clinicians. It takes the reader step by step through the process so that any journal article can be easily read, evidence evaluated and the results and their reliability truly understood. By integrating this with knowledge of local skills and resources and patient preference, the reader will be able to apply the best possible care that his or her patients deserve. This accessible book is suitable for undergraduates and postgraduates of all medical specialties, nursing, paramedics, pharmacists and all allied health professions. It is the ideal reference for anyone needing help writing a clinical topic review, reviewing a paper in a journal club or preparing for a critical appraisal exam. But most importantly, it is essential for those who wish to practice medicine in the best possible way for their patients using the best evidence tailored to the individual. *Lecture Notes on Paper Critique* L. O. Ogundipe, Hodgson, R. E., 2005 The text is presented in chunks of approximately 10 True/False questions on specific concepts in research methodology and statistics. This is followed by clear explanations from first principles that assume no prior knowledge. This book is for the paper critique section of the MRCPsych 2 examination but clinical tutors, organisers of journal clubs and clinicians interested in research will find the book helpful. It is particularly invaluable for clinicians interested in evidence based medicine. This book is intended to be used as an aide memoir carried in the pocket and referred to as often as necessary. It enables self assessment to be carried out in the hope that any gaps in knowledge will be identified. Much of this book focuses on practical application of statistical and research methodology concepts into critical paper reading. The reader is encouraged to attempt the questions before the reading, the suggested answers. **Critical Reading** Ben Yudkin, 2006-04-18 Being able to understand and use primary research is an essential tool in any scientific career.
