NAEP 1992 Mathematics State Report for New York National Assessment of Educational Progress, Princeton, NJ., 1993 In 1990 the National Assessment of Educational Progress NAEP included a Trial State Assessment which for the first time in the NAEP's history made voluntary state by state assessments. This 1992 mathematics report marks the first attempt of the National Center for Education Statistics NCES to shift to standards based reporting of National Assessment statistics. NAEP results are reported by achievement levels which are descriptions of how students should perform relative to a body of content reflected in the NAEP frameworks in other words how much students should know. The 1992 assessment covered six mathematics content areas: 1 numbers and operations 2 measurement 3 geometry 4 data analysis statistics and probability 5 algebra and functions and 6 estimation. In the District of Columbia 2 399 fourth grade students in 107 public schools and 1 816 eighth grade students in 35 public schools were assessed. This report describes the mathematics performance of District of Columbia fourth and eighth grade students in public schools and compares their overall performance to students in the Northeast region of the United States and the nation. The distribution of the results are provided for subpopulations of students including race ethnicity type of community advantaged disadvantaged urban extreme rural and other parents education level gender and content area performance.
