Myers-Scotton, 1993 Codeswitching may be broadly defined as the use of two or more linguistic varieties in the same conversation Using data from multilingual African context Carol Myers-Scotton advances a theoretical argument which aims at a general explanation of the motivations underlying the phenomenon She treats codeswitching as a type of skilled performance not as the alternative strategy of a person who cannot carry on a conversation in the language in which it began Speakers exploit the socio-psychological values associated with different linguistic varieties in a particular speech community by switching codes speakers negotiate a change in social distance between themselves and other participants in a conversation Switching between languages has much in common with making stylistic choices within the same language it is as if bilingual and multilingual speakers have an additional style at their command when they engage in codeswitching \_
