Introduction to Health Care Management Sharon B. Buchbinder, Nancy H. Shanks, Bobbie J. Kite, 2019-10-14.

Seeing the City Nanke Verloo, Luca Bertolini, 2025-10-01. The city is a complex object. Some researchers look at its shape, others at its people, animals, ecology, policy, infrastructures, buildings, history, art or technical networks. Some researchers analyse processes of inclusion or exclusion, gentrification or social mobility, others biological evolution, traffic flows or spatial development. Many combine these topics or add still more topics beyond this list. Some projects cross the boundaries of research and practice and engage in action research while others pursue knowledge for the sake of curiosity. This volume embraces this variety of perspectives and provides an essential collection of methodologies for studying the city from multiple interdisciplinary and transdisciplinary perspectives. We start by recognizing that the complexity of the urban environment cannot be understood from a single vantage point. We therefore offer multiple methodologies in order to gather and analyse data about the city and provide ways to connect and integrate these approaches. The contributors form a talented network of urban scholars and practitioners at the forefront of their fields. They offer hands-on methodological techniques and skills for data collection and analysis. Furthermore, they reveal honest and insightful reflections from behind the scenes. All methodologies are illustrated with examples drawn from the authors' own research, applying them in the city of Amsterdam. In this way, the volume also offers a rich collection of Amsterdam-based research and outcomes that may inform local urban practitioners and policy makers. Altogether, the volume offers indispensable tools for and aims to educate a new generation of interdisciplinary and transdisciplinary-minded urban scholars and practitioners.

E-learning and Disability in Higher Education Jane K. Seale, 2013-10-08. Most people working within the higher education sector understand the importance of making e-learning accessible to students with disabilities, yet it is not always clear exactly how this should be accomplished. **E-Learning and Disability in Higher Education** evaluates current accessibility practice and critiques the extent to which best practices can be confidently identified and disseminated. This second edition has been fully updated and includes a focus on research that seeks to give voice to disabled students in a way that provides an indispensable insight into their relationship with technologies and the institutions in which they study. Examining the social, educational and political background behind making online learning accessible in higher and
